# **OPEC President Says Cartel** Narrows Dispute on Price Cuts

GENEVA - OPEC narrowed its disagreements Tuesday on a plan to reduce prices, according to the organization's president. After morning and afternoon sessions, the ministers called a re-

cess. A planned late-evening ses-sion was later canceled, and the next meeting set for Wednesday. Pressure on the Organization of Petroleum Exporting Countries to take decisive action was heighte when Egypt, an observer, left the

that Nigeria wanted to narrow the \$4 spread to \$2, while Sandi Arabia favored \$2.90. Even if they could agree what the spread should be setting new prices for each of the dozens of different grades of OPEC

The organization is under pres ure to set new prices because, unthe current prices, some memcustomers for their allocated share of OPEC all production. In October, Nigeria cut its prices by up to \$2 a barrel without OPEC approval, in reaction to smaller cuts by

The pricing plans under discussion Tuesday called for Nigeria to move its price back up by at least 65 cents a barrel, according to con-ference sources, who asked not to

plans would force a cut in the price of Arabian light, they said.

The prospect that Nigeria would roll back some of its October price cut, and that OPEC was approach-ing a decision on prices, helped oil markets recover from a turbulent session Monday. There was little change in prices Tuesday on the spot, or noncontract, market.

Arabian light crude for February delivery continued to be quoted at \$27.60 a barrel on the spot market, according to Telerate Energy Service, a private market-information business. West Texas Intermediate crude, the major U.S. grade of oil, rose to \$25.40 a barrel for March delivery in spot markets, after dropping below \$25 on Monday, a five year low.

None of the acrimony that marked Monday's meeting was evident Tuesday. On Monday, the oil minister of the United Arab Emirates, Mana Said al-Oteiba, walked out temporarily, accusing the Nigerian minister, Tam David-West, of undermining the OPEC pricing

On Tuesday, Mr. Kandil said: " just went in to salute them and I told them I'm leaving and please don't invite me anymore to the meetings." He said that the pro-

state-owned mines, says about restraining production and moving 78,000 miners are defying the union by working with hundreds said, "I doubt it."

On Monday, the observing Mexican delegation told the OPEC ministers that Mexico was growing weary of the cartel's lack of discipline and internal bickering.

two choices. Either we can have the of a struggle over how to reduce the military cuts you want, but in that federal deficit, now running at more than \$200 billion a year. Robert J. Dole, the Senate majority leader, said Friday that it

would be difficult to achieva struc-cuts in popular domestic programs unless the president agreed to cut interview broadcast Saturday Mr. Reagan rejected that view, calling further reductions in the growth of military spending "very risky."

The budget that Mr. Reagan is preparing projects a \$178-billion deficit for the next fiscal year, if about \$51 billion in spending cuts can be achieved. The administration had earlier estimated that \$50

billion would have to be cart. The figures were confirmed by dministration officials Monday after the budget director, David A. Stockman, reportedly used them in a private White House briefing for business executives, Mr. Reagan's budget for the fiscal year 1986, which starts Oct. 1, is scheduled to

go to Congress on Feb. 4. The economic forecast to be presented with the budget includes sig-nificantly lower inflation rate this year than had been predicted as recently as a month ago, according to economists who helped prepare it. The administration's expectations on growth and unemploy-

ment remained constant. Under the administration projections, the deficit would be held to \$140 billion in fiscal 1988, nearly \$40 billion more than Mr. Reagan

estimated recently. After a White House meeting with Mr. Reagan and his top economic advisers, the Finance Committee members said that rigid opposition to further reductions in the administration's military spending proposals could jeopardize congressional support for other elements in the \$51-billion sav-

ings package. The senators, who were joined at the White House by Republicans on the House Ways and Means Committee, advised Mr. Reagan to proceed first with spending cuts before seeking a simplification of the federal tax code. That contrasted with a dual-track strategy sug-gested by James A. Baker 3d, the secretary-designate of the Trea-

Senator Packwood said: "The uniform advice to the president from everybody there, as we went around the room, was spending cuts, spending cuts, spending cuts, and then, Mr. President, after we've tackled that, after we've tried and hopefully succeeded, let's look at the tax reform bill."

Republican congressional leaders said Monday after meeting for an hour with President Reagan that the White House would delay submitting a tax-simplification bill to Congress for several months, The Washington Post reported. Senator Packwood said Republi-

cans in both houses agreed that the tax proposal should wait until Congress has dealt with the budget. "The point was made forcibly that many of the allies we need on

**Egypt Under Mubarak: Stability** Restored, but Hard Choices Put Off

Seeking the Middle Path

First of four articles. conjures up the image of a rudderless ship of state marooned in dead water. Early in March, Mr. Mubarak will make his fifth

trip to Washington. This time he is in search of an increase of close to \$1 billion in U.S. aid and in quest of a new activism by the Reagan administration to revive the Middle East peace process.

If Mr. Mubarak is still something of an enigma for Washington, the same is true for his own country. The

honeymoon he enjoyed after Sadat's death is clearly

over. But the Egyptian public has yet to pass judgment Meanwhile, Egypt's social and economic problems are beginning to close in on him. The time for hard choices, which he has adeptly put off, is near.

Under Mr. Mubarak, Egypt has been noticeably outside the international limelight.

From the very start of Mr. Mubarak's administra-

and probably the root of his extraordinary caution. It is now even more important as the threat of Libyan subversion looms larger and Moslem fundamentalists

Neither beloved nor disliked by his people, Mr. Mubarak, at 56, has yet to make his own mark on Egyptian politics. His instinct always to seek the to determine who he really is or what he wants for his

# Mubarak Now Facing Hard Choices

(Continued from Page 1) litical significance for both Egypt and the Palestinians, he replied cryptically:

"Egypt is Egypt." Nor is Mr. Mubarak credited with breadth of vision, and the Columbus station, and possibly the doubtedly be mentioned in the fipopular jokes in circulation - a tudes in the absence of polls here do not flatter his intelligence or

> political problem, from the start, has been the absence of a personal power base.

The hero of the Egyptian Air Force in the 1973 Arab-Israeli war, he was selected by Sadat as his vice president, remained a silent understudy in his shadow and was suddealy propelled into the presidency upon Sadat's assassination in Octo-

Unlike Sadat, he had neither the legitimacy of being a "founding father" of the 1952 revolution, a base in the army, the main branch of the Egyptian armed forces, or any flair for politics. In the words of Mohammed Heikal, a journalist and Nasser's longtime confidant. "He is the only technocrat-president that

we have had." "His experience is that of a pilot," used to depending on indica-tors and gauges to guide him, Mr. Heikal said. "The trouble with politics is that you sometimes should react to indicators that have no hands. You have to react to ab-

stractions and public opinion." Mr. Heikal, a bitter opponent of adat. gave Mr. Mubarak high marks for his first six months in power, in defusing the sectarian and political tensions that have brought Egypt to the boiling point. But he said he feels Mr. Mubarak has since missed many opportunities to establish himself as a true leader and is still moving too slow-

ly, a view shared by many Egyp-Was he, then, the right man for the time in Egypt?
"More or less," Mr. Heikal con-

ceded. "Egypt wanted a man to put some ice on its head to lower the temperature and I think he did that

In retrospect, it now appears that Mr. Muharak missed an opportunity in May to establish both his popularity and legitimacy by his handling of elections for the People's Assembly. Instead of emerging as the standard bearer of a "new democracy," Mr. Mubarak came out of them looking like another Sadat, who regularly won his referenda with 99.9 percent of the

Mr. Muharak insisted on what was probably the most free electoral campaign since the 1952 revolution. But then he inexplicably allowed the prime minister at the time, Fuad Mohieddin, to mobilize the country's huge bureaucracy to produce a crushing victory for the ruling National Democratic Party.

that clearly favored the ruling parwhat he thought of Yasser Arafat's ty, kept all the leftist parties out visit here in December 1983, a and allowed only the New Wald long-awaited event with much political significance for both Egypt politics before the 1952 revolution. to get a foothold in the assembly.

The elections disappointed Egypt's restless intelligentsia and crushed its hopes for the birth of full democracy. For Mr. Mubarak, it raised questions about his ability traditional indicator of public atti- to control his own prime minister and government that still have not been answered.

With all due respect, Mr. Mu-At the center of Mr. Mubarak's barak is a sincere and honest man being misled by people in the gov-ernment." said Mumtaz Nassar, leader of the New Wafd opposition bloc in parliament, "He has good intentions and I'm sure he wants democracy, but if the rules remain the same, there can be no democra-

that Mr. Muborak is up against

But while the courts have succeeded in reopening Egyptian poli-tics to some opposition parties, the government bureaucracy and the ruling party have time and again blocked proposed changes and fought to preserve their powers.

The result has been that the ruling party and government often seem to execute policies against the declared intentions of Mr. Mubarak. This gives outside observers the impression that Mr. Mubarak is not fully in control.

The question being increasingly posed by Western analysts is how Mr. Mubarak will fare now that he has overcome the "Sadat legacy" and begins facing problems of his own making

Such tests are not far off. The government is planning a series of price increases for key commod-The elections, whatever their ities such as gasoline, electricity faults, did make clear nonetheless and bread. In 1977, this led to violence in the streets of Cairo.

The increases will come at a time

among the Moslem extremists.

Hosni Mubarak, left, who at the time was vice president, with Anwar Sadat on the day of Sadat's assassination.

three formidable conflicting political blocs. Two of them, the rising of high inflation and general grum-Wafdist current and the Moslem fundamentalists, are hostile to the hard to tell whether they will touch 1952 revolution and want to off new violence. The government change radically the existing order.

The third force, the 315,000-man army, remains silent but is unlikely to allow power to slip.

Egyptian and foreign analysts agree that Mr. Mubarak inherited a heavy political legacy from Sadat. The assassinated president had alienated almost every segment of society in the last months of his rule - Moslem fundamentalists, Christian Copts, leftist and rightist poli-ticians, intellectuals and business-

It took Mr. Mubarak until early this month, or three years and three months, to absolve himself of this "Sadat legacy." The final step was ending the banishment to a desert monastery of the Coptic Christian patriarch, Pope Shemudah III, and his reinstatement. This has gone a long way toward appearing Egypt's five to six million Copts.

On Sept. 30, a special security however, are using the govern-ment's present leniency to orga-nize, convert and preach. This acade another decision that assuaged the Moslem fundamentalists: 174 extremists implicated in an uprising in the southern town of tivity leads observers to predict that it will not be long before an Asyut immediately after Sadat's assassination, in which 87 persons died, were acquitted; 107 others were sentenced to prison terms ranging from two years to life imprisonment but nobody was exe-

A new freedom for institutions is developing under Mr. Muharak. The most remarkable example is the courts. They are showing an unusual degree of independent de-cision-making, throwing out as unconstitutional many of Sadat's de-

The chief judge in the trial of the Moslem extremists later defended the leniency of the sentences in an interview, significantly with the pro-government Al Ahram. The judge said was persuaded by testimony from many of the 302 defendants of torture and forced confes-

problem and has studiously tried to avoid making the same errors. But his obsession with security and his lack of self-assurance make it difficult, analysts say, to predict how he will react in a similar crisis. Not until Mr. Mubarak faces his

first serious crisis, which he has so far avoided mostly by not making any radical decisions, is the real Mr. Mubarak likely to stand up, observers say. Until then, it will remain unclear whether he is merely a caretaker president and interim leader or the next modern-day pharach of Egypt.

# WORLD BRIEFS

# Gasoline Price War Looms in France

LUXEMBOURG (Reuters) - The European Court of Justice, in a ruling that seemed certain to set off a price war among service stations in France. Tuesday upheld the right of a French entrepreneur, Edouard

Leclere, to sell gasoline at cut-rate prices.

Mr. Leclere's attempt to entice shoppers into his supermarkets by offering more than double the discount allowed under French law at regular service stations was opposed by the French government. The major petroleum companies. Elf Aquitaine and Cie. Française de Raffin age had already indicated they were set for a price war if the verdict went \_\_\_\_\_\_Mr. Leclere's way.

The court ruled that the method the French government used to calculate its minimum price breached Enropean Community rules.

French courts have already ruled in favor of Mr. Leclerc, who heads a family with the reputation of France's most aggressive cut-rate traders.

Last week the French government, anticipating the court's verdict, announced its intention to adapt the price law that dates from 1928.

The maximum discount allowed in France was 17 centimes a liter (8 cents a gallon), whereas Mr. Leclerc offered 35 centimes a liter, Gasoline in France has been selling at about 5.30 to 5.80 francs a liter,

### EC Vows New Ideas on Iberian Entry

BRUSSELS (Reuters) — The European Commission pledged Tuesday to present new ideas next week to speed up the stalled negotiations for Spain and Portugal's entry into the European Community.

Community foreign ministers had set a March deadline on Monday for completing negotiations to enable the two countries to join on schedule

Community officials said that Lorenzo Natali of Italy, the member of the Executive Commission who heads the negotiations, told ministers Tuesday that the commission would present a balanced package of proposals by the end of next week to reconcile conflicting national interests.

### Egypt Wins Loan for Nuclear Plant

WASHINGTON (WP) — The Export-Import Bank, under heavy pressure from the State Department and the National Security Council, has reversed its earlier opposition to helping Egypt build a nuclear power plant and has offered the Egyptian government \$250 million to finance the purchase of U.S.-made equipment for the project.

The bank, a government-funded, independent agency, had refused to

approve the loan on the ground that Egypt's policy of subsidizing energy prices at artificially low levels would prevent the proposed plant from becoming economically viable. The cost of the project is estimated at \$2

billion to \$3 billion. However, administration officials said the bank's directors switched positions last month after Secretary of State George P. Shultz and President Ronald Reagan's national security adviser, Robert C. McFarlane, argued that American aid was of major importance to the U.S. strategy of keeping President Rosni Mubarak of Egypt a close ally in the Middle East.

# Baker Confirmed to Head Treasury

WASHINGTON (AP) - The Senate voted, 95-0, Tuesday to confirm James A. Baker 3d as secretary of the Treasury. Mr. Baker, a Texas lawyer who has been chief of the White House staff for four years, is trading jobs with Donald T. Regan, a former Wall Street executive. The switch is to

Mr. Baker, 54, was confirmed after Senator William Proximire, Democrat of Wisconsin, the only member to question the nomination, finally

praised him as skillful and effective.

Earlier, the Senate Finance Committee unanimously recommended confirmation of Richard G. Darman as deputy secretary of the Treasury and of Ronald A. Pearlman as assistant secretary for tax policy. Mr. Darman has been a senior aide to President Ronald Reagan; Mr. Pearlman has been acting as the administration's chief tax authority.

### For the Record

Syria's parliament, the People's Council, unanimously nominated President Hafez al-Assad on Monday for a third term and set Feb. 10 as the date of a presidential referendum. Mr. Assad, who has been in office since 1971, will be the only candidate. (AP)

Funds belonging to Licio Gelli, a leader in Propaganda Due, the Italian Masonic lodge, will remain frozen, a Swiss court ruled Monday. Mr. Gelli was arrested in September 1982 at a Geneva bank, and accused of presenting false documents concerning accounts held there. He escaped from a Geneva prison in August 1983.

Six convicted criminals escaped Tuesday from a prison near the Italian Adriatic coast city of Pescara, after a shootout in which six guards were wounded, the ANSA news agency said. Four of the guards were reportedly in serious condition with bullet and knife wounds. (AP)

# U.S. Assures Rabin On Mideast Talks With Soviet Union

By John M. Goshko

Washington Past Service
WASHINGTON — The United States has assured the Israeli defense minister, Yitzhak Rabin, that while the United States intends to resume "working-level talks" with the Soviet Union on the Middle East, it remains firmly opposed to Table 2 list any attempts to resolve the Arab-Israeli dispute through an internarional conference in which the Soberian En viet Union would participate.

Sources said Mr. Rabin received those assurances in separate meetings Monday with Secretary of State George P. Shuitz, Defense Secretary Caspar W. Weinberger to jour ave and Robert C. McFarlane, the national security affairs adviser.

Line Bar The sources said Mr. Rabin had expressed Israel's concern about the meaning of a recent announcement that the United States periodically will exchange views with the Soviet Union on regional issues, including the Middle East.

Mr. Rabin, according to the

fied Overte State Buside sources, said that broadening the Middle East peace process requires the removal of what he called "two pletion of Israel's withdrawal from Lebanon in a way that guarantees the security of Israel's northern borders, and an end to the freeze that President Hosni Mubarak of Egypt has put on continued normalization of relations with Israel, aclear Plan

The sources said Mr. Rabin, who was beginning a three-day visit to Washington, also gave Mr. Shultz a reply to a recent message from the secretary to Shimon Peres, the 1sraeli prime minister. Mr. Shultz re-portedly told Mr. Peres that a U.S. drawal from Lebanon and his decision on Israel's request for country's economic crisis. \$800 million in emergency economic aid could not be made until the ue to coordinate with Syria "be-United States had evidence of a cause our interests are one."

comprehensive plan to curb Israel's inflation and restore the country's government figures put the annual inflation rate at more than 1,200

According to the sources, the response delivered by Mr. Rabin included a summary of the steps tak-

While the sources indicated it was likely to be some time before the administration decides about Israel's requests for economic aid they added that President Ronald Reagan was expected to inform Mr. Rabin on Wednesday that he would ask Congress for \$1.8 billion in military assistance for Israel for next year, an increase over this year's \$1.4 billion.

The idea of free trade between in 10 years will erase all tariffs the two countries was one of a number of military and economic administration and Israeli sources concessions made by President Ronald Reagan during a November 1983 meeting with Yitzhak Shamir, who then was prime miniscomplete, the sources said Mon-strategic ties between the two coun-

for increased military and economic aid. Israel's request for an emer-gency gift of \$800 million on top of \$1.9 billion in economic aid for 1986 is under consideration by the

Reagan administration. The free-trade agreement is unlikely to have an immediate impact on Israel's economic problems, said Dan Halpern, economic minister at the Israeli Embassy and the key negotiator for his country. But the pact will help Israel's long-term nam's prime minister and foreign economic prospects by increasing its exports to the United States and by directing more American invest-

ments to the country, he added. "I think the whole package is a good one," Mr. Halpern said. "This package can work only if it is of mutual benefit. A trade agreement that is not mutually advantageous will not last more than a few years and we want this to last forever."

Israel already has a free-trade pact with the European Community, the second-largest market in the world, ranking just behind the United States.

The pact will not be made public or signed, however, until key conpressmen and advisers in the private sector from affected industries in the United States have a chance to review it. This process is likely to be completed within 45 days, administration trade officials said.

# Egypt, Israel Fail to Reach **Pact on Taba**

BEERSHEBA, Israel - Three days of talks on a border dispute between Egypt and Israel ended Tuesday with the two sides failing to reach a final agreement, Israeli sources said.

The sources said agreement was reached on technical aspects of deploying a multinational force in the disputed Red Sea resort of Taba. But they said Israel rejected Egypt's demand that Israeli border police be completely withdrawn from the 250-acre (101-hectare) tract, which includes an Israeli-run hotel and holiday village.

Ehud Gol, a spokesman for the Israeli Foreign Ministry, said the two sides would issue a paper summing up the three days of talks. He said that a few points could not be answered Tuesday and that he expected further talks at a later date

would be necessary.
Officials have said that the talks may be reconvened at Ismailia, on

the Sucz Canal. Mr. Gol said the summary paper was drawing ideas from both sides and that the teams were "trying to formulate them so that both sides

George P. Shultz, left, the U.S. secretary of state, greeted Defense Minister Yitzhak Rabin of Israel as Mr. Rabin arrived for a conference at the State Department.

# Reagan to Visit Bonn, Madrid, Lisbon in May

By Bernard Weinraub

New York Times Service WASHINGTON — President Ronald Reagan will visit West Germany, Spain and Portugal in May on a tour aimed at underscoring U.S. commitments to those three Western European countries. White House officials said.

Mr. Reagan's swing through West Germany May 5-8 will follow the two-day economic conference May 2-4. During his visit. White House officials said Monday, Mr. not recall the horrors of the conflict, a White House official said. Reagan will commemorate the 40th anniversary May 8 of the victory in Europe over the Germans, and confer with Chancellor Helmut Larry Speakes, the White House

spokesman, said the visit to West Germany would be followed by a cized. trip to Spain May 8-10. White House officials said the European trip would then continue to Portugal May 10-12. The scheduled visits will be Mr. Reagan's first to Spain and Portugal as president.

White House and State Departespecially significant because both countries are fledgling European democracies in which the United States has pivotal military bases.

"Here are two nations who, with-

that these are democracies," an administration official said. "They have joined the Western democratic world, and Reagan being there

Details of the visit to West Germany have not yet been worked out, and officials said the trip was delicate because it coincided with V-E Day. Mr. Reagan shelved a plan to visit a concentration camp because he wanted to underscore of industrialized nations in Bonn the "reconciliation" after the war,

In his talks with the Spanish prime minister. Felipe González, a Socialist, Mr. Reagan is expected to seek better relations with Madrid and to explain administration policy in Central America, which Mr. González has at times criti-

Administration officials emphasized that Mr. Reagan, with his visits to Spain and Portugal, would seek to underscore U.S. reliance on military bases in the two countries. In Spain, the air force has bases at Torrejon, 19 miles (30 kilometers) ment officials emphasized that the north of Madrid, and Zaragoza, trips to Spain and Portugal were north of Torrejon. The navy has a base at Rota, near Cadiz.

# Pérez de Cuéllar, Dong Hold Talks in Hanoi

By Barbara Crossette

New York Times Service HANOI - The secretary-generminister held several hours of talks Tuesday that United Nations officials called "frank and useful."

The men apparently had some blunt exchanges on Cambodia and other problems in Southeast Asia. The discussions with Foreign Minister Nguyen Co Thach, which were due to end Tuesday morning. have been extended to Wednesday. when Secretary-General Javier Pérez de Cuellar is planning to return

to Bangkok. Mr. Pérez de Cuéllar, aides suggested, has been delivering messages to the Vietnamese from the Thai government, and will return to Thailand with Vietnamese re-

Thailand believes that it is taking the brunt of the effect of the Vietnamese war against guerrillas at-tempting to overthrow the Cambodian government installed by Hanoi in 1979. Vietnam accuses

Thailand of giving active support to the guerrillas. Mr. Pérez de Cuéllar is also discussing the Vietnamese-Chinese border conflict and international issues of interest to Vietnam.

On Tuesday afternoon, the sec-retary-general met with Prime Min-ister Pham Van Dong at the presidential palace. The prime minister, 78, a founding member of the Vietnamese Communist movement and head of government since 1955. walked unsteadily as he ushered Mr. Pèrez de Cuéllar into the meeting. The two men spoke in French without intepreters.

The secretary-general told Mr. Dong that their meeting was a "very important opportunity for an evaluation of so many problems."

Prime Minister Dong replied: We must look after what may be possible and feasible regarding the problems that preoccupy us."
Mr. Pérez de Cuéilar, who earlier

Tuesday visited the mausoleum where the embalmed body of Ho Chi Minh lies in state, also brought to Vietnam a message from Jeane J. Kirkpatrick, the U.S. delegate to the UN, asking Hanoi to cooperate more actively with the United States in searching for the remains of Americans missing in action from the Vietnam War.

A similar message had been passed on to the Laotian govern-ment when Mr. Pèrez de Cuèllar stopped in Vientiane on his way from Bangkok, the UN aide said.

The subject of missing Americans is a contentious one in Vietnam, where many Vietnamese citi-zens are still unaccounted for a decade after the end of the war. The Reagan administration has made ue of the missing a major obstacle to improved relations with

The Vietnamese and Laotians insist that they cannot afford to conduct extensive searches, particular-ly since so many of their own people are missing. They do not want the United States to do the job for them.

Diplomats in Hanoi say most if not all of the missing Americans are dead, and they say it is unfortunate to encourage false hopes among relatives.

### Polish Leader to Visit India

# Westmoreland Troop Figures Assailed

By M.A. Farber New York Times Service

NEW YORK - A former U.S. representative and two former CIA analysts testified Monday that General William C. Westmoreland should not have removed the Viet Cong's self-defense forces in 1967 from the official listing of enemy strength known as the order of bat-

The decision to delete those forces, which also resulted in their not being counted in a special intelnce estimate for President Lyndon B. Johnson in November 1967, is a key issue in the 16-week trial of General Westmoreland's \$120-million libel suit against CBS. The suit stems from a 1982 docu-

mentary, "The Uncounted Enemy: A Vietnam Deception," that accused the general's command in Saigon of engaging in a "conspira-cy" to show progress in the Viet-nam War by understating the size and nature of the enemy.

That thesis was based largely on 15 years of research by a former analyst for the Central Intelligence Agency, Samuel A. Adams, who was a paid consultant for the broadcast and is now a defendant in the lawsuit

General Westmoreland, who Vietnam from January 1964 to June 1968, contends that the broadcast defamed him by saying he had lied about enemy troop strength to President Johnson and the Joint Chiefs of Staff.

The witnesses for CBS in Federal District Court in Manhattan Monday were Paul N. McCloskey Jr., a representative from California between 1967 and 1982 who ran for the Republican nomination for president in 1971 on an anti-war platform, and Douglas J. Parry and John I. Dickerson, who were CIA analysts in 1967.

Mr. Parry, who had worked at CIA headquarters in Langley, Virginia, said CIA officials had been "cowards" for "conforming" in 1967 to the newly adopted position of General Westmoreland's com-

consequential militarily and could

not be estimated accurately. Mr. Parry also testified that, after the Tet offensive of January 1968 the CIA estimated that North Vietnamese infiltration into South Vietnam during the fall of 1967 was 20,000 to 30,000 a month, quadrunle the rate stated at the time by General Westmoreland's command. The documentary used a monthly figure of 20,000, too, and said that the command had blocked reports about the higher

infiltration. Judge Pierre N. Leval twice reminded the jury that the "truth" issue in the case was not whether the command's estimates "were right or even close to right." The issue, he said, is whether they were made "honestly."

Mr. Dickerson, who worked in 1967 at the CIA's station in Saigon, said he came to believe that the military was involved in a "conscious effort, a deliberate conspiracy to keep the numbers in the order of battle below a certain pre-defined, arbitrary level."

Like other witnesses for CBS, both Mr. Dickerson and Mr. Parry were called to the stand to demonstrate that Mr. Adams had a reasonable basis for his views about the enemy strength dispute and was not alone in those views. Both said they conveyed their sentiments to Mr. Adams in 1967.

Mr. McCloskey recalled meeting Mr. Adams in the spring of 1973. when they both testified at the Pentagon Papers trial of Daniel Ellsberg. Shortly thereafter, Mr. Mc-Closkey said, Mr. Adams went to his office on Capitol Hill with a package of documents two or three inches thick, that he wanted Mr. McCloskey to keep in his safe.

"He was afraid that something would happen to him or the documents," Mr. McCloskey said. Mr. McCloskey, who is now

Mr. McCloskey, Mr. Adams returned for the package and showed him some of its contents. Among the documents, Mr. McCloskey said, were cables that had been sent in August 1967 from General Westmoreland's command to the Pentagon and the CIA.

Under questioning by Michael R. Doyen, a lawyer for CBS, Mr. McCloskey identified one of the documents as an Aug. 19, 1967, cable from General Creighton W. Abrams, General Westmoreland's deputy, to General Earle G. Wheeler, chairman of the Joint Chiefs of Staff.

In the cable, which General Westmoreland supported in a brief message to General Wheeler the next day, General Abrams minimized the abilities of the self-defense forces, opposed their contin-ued inclusion in the order of battle and warned that the press would draw "an erroneous and gloomy conclusion" from new intelligence estimates that would increase the number for those forces from 70,000 to 120,000.

Mr. McCloskey said he was "shocked" when he read the docu-ments "and I told Adams, I may even have been the one who used the word, that I thought it was a conspiracy" by General Abrams and General Westmoreland and by Robert W. Komer, who was head of the pacification program in South Vietnam

about six weeks for persons holding prescriptions. Zovirax is the company name for a drug called acyclovir, which was first used in ointment form in 1982. # **Botha Tries Bargaining**

Echoes of the new constitution introduced its certainty that he is pursuing racial integration. It appears, however, that he designed his in South Africa last year continue to reverber-ate. By offering a political voice to the Asian and mixed-race minorities but not to the black majority, it produced a wave of black unrest. The government responded evasively with a vague promise of black "political participa-tion." Black agitation surged, the white business community started declaring that apart-heid is bad for business and anti-apartheid pressures, popular and official, began building in America. Result: President P.W. Botha, insisting that Pretoria will not bend, is bending

 on the key issue of black political rights.

His latest step is an unprecedented hint of a political role for urban blacks, who work in the white economy and live outside the artificial "homelands" to which apartheid consigns them for the purpose of denying them political rights in South Africa. It is only a hint; this is the typical crab-like performance of a leadership that, while anxious to disarm foreign and domestic criticism, is no less anxious to avoid further erosion of its core white constituency. But it is a major event all the same,

Among whites, liberals reacted with cau-tious approval. The Afrikaner element that has broken with Mr. Botha found confirmation of

Here it is fascinating to ask what Mr. Botha had in mind by allowing South Africa's best known nationalist, the long-imprisoned Nelson Mandela, to give a rare interview to a (British) newspaper just now. Last month Mr. Botha said he would not negotiate with any

for change. The Reagan administration encourages change quietly, others push more forcefully. It seems to be having an effect.

ready to give the unwelcome advice that the

# Not an Attorney General

Eleven months have passed since Edwin Messe went before the Senate Judiciary Committee seeking confirmation as Attorney General. Although slight of legal stature, he had the warm endorsement of a popular president and seemed easily confirmable. But questions arose about his fitness for the office, and they were serious enough to require a special inves-

tigation by an independent counsel. The counsel concluded that none of the charges warranted a criminal indictment, so the president renewed the nomination. This week the Senate returns to the crucial question: What qualifies Mr. Meese for this job?

There is much to be said for letting presidents have their choice of cabinet officers. But unless the qualifications are cut to fit the candidate, Mr. Meese is not a desirable choice. Some senators seem in no mood to measure the nominee. For them the key factors are Mr. Reagan's landslide re-election and the independent counsel's report that Mr. Meese has done nothing criminal. Yet senators voting to confirm or reject should apply a higher stan-

dard of what an attorney general ought to be. The person entrusted with the Department of Justice need not be a legal scholar or master of every legal specialty under his direction, but he should be learned in the law and he should have distinguished himself in its practice and application. Moreover, he should aspire to be the conscience of any administration, guiding the president in setting its ethical and moral tone. He should become not only the president's advocate but also his chief legal adviser,

words to preserve his political base - whites who believe in controlled change to survive.

Can their sort of change meet the sort of change blacks demand? Mr. Botha pleads with "responsible black leaders to take the hand that is being extended to them." But a huge burden rests on him to offer enough promise of equality and dignity to let them take his hand.

group favoring change through violence. Mr. Mandela now says that his African National Congress would halt violence if the authorities "legalize us, treat us like a political party and negotiate with us." That, like Mr. Botha's remarks, is, in effect, bargaining.
In such bargaining Americans have a role that is secondary but: to press unremittingly

- THE WASHINGTON POST.

law limits his client's power. When visible, Mr. Meese's approach to the law has been aggressively opportunistic. As White House counselor he sought to wipe out years of gains in civil rights by restoring tax exemptions to schools that discriminate against blacks. Even at the risk of abusing executive power, he led the effort to sabotage Congress's repeated affirmation of a law creating a federal program of lawyers for poor people. Without a trace of courtesy to a re-sponsible adversary, he kept calling the Ameri-can Civil Liberties Union a "criminals' lobby."

In explaining his failure to report financial favors by benefactors who then obtained government jobs, Mr. Meese convinced the independent counsel, Jacob Stein, that he attaches no legal significance to some of these transactions and simply could not remember others. That negates criminal intent but it does not make Mr. Meese a bloodhound when it comes

to questionable conduct in high office. The United States has endured some undistinguished attorneys general. It has also been blessed with some whose achievements in law enforcement, civil rights and the protection of liberties marked them for honor. Mr. Meese would be a throwback to the kind of attorney general that the last Watergate prosecutor warned against: the political manager, the presidential buddy. The standard for performance in this critical job has been rising. Mr. Meese doesn't measure up.

-THE NEW YORK TIMES.

# Other Opinion

Pakistan remains not so much a nation with an accepted constitution as a collection of peoples held together by an army and by the pressures of the Cold War. It is riven, too, by the populist urban proletarian pressures which the Bhutto movement rode. The military could, if it so decided, replace the president overnight in classic Pakistani style. Radical elements of the army could unite with the quiescent urban mob. A relaxation of international tension could leave the United States less adamantly opposed to Sindhi or Baluchi autonomy. The new constitution may be a skillful patchwork quilt but it is no more than a quilt thrown over an unmade bed.

The problems that President Zia inherited remain. They are the problems Pakistan has juggled since its bloody birth. There is good reason to suppose that those problems will outlive even the adroit President Zia, his Islamic republic and the restricted assemblies he is calling into being.

- The Guardian (London).

### America, China and Bystanders

It is the grass that suffers when elephants fight, says an African proverb. The grass, as a bit of inspired retelling had it, does not fare any better when elephants make love.

This is a point worth recalling at this juncture when China and the United States are talking about military cooperation and Washington plans the sale of military equipment to Beijing. Do the interests of smaller powers

A Quilt for Unmade Pakistan need always be trampled underfoot when the world's greatest power starts supplying arms to a potential global power? [It has been agreed that] China, worried about Russia's intentions, needed help in modernizing its almost antique navy and that all the nations on the Pacific rim would gain by that ...

- The Singapore Monitor.

Meese Shouldn't Be Confirmed If Edwin Meese is confirmed as attorney general, we will be taught a dismaying lesson about the state of our public ethics and about the moral code of the United States Senate.

In Washington, it seems, the finding of the independent counsel that there was insufficient evidence to prosecute Mr. Meese for actual crimes is being interpreted as a clean bill of health that should lead to his speedy confirmation by the Senate. But the independent counsel's 385-page report is anything but a vindication. It contains detailed, largely uncontested evidence of Mr. Meese's low regard for ethics in government and of his willingness to engage in behavior that raises the most serious questions about his fitness to become

our country's chief law-enforcement officer. The president of a large university asked me last spring: "How can you and I continue to try to teach young men and women to recognize moral standards if the Senate votes that what Ed Meese did does not bar his confirmation as attorney general of the United States?"

- Archibald Cox, a former Watergate special prosecutor who teaches law at Boston University, writing in the Washington Post.

### FROM OUR JAN. 30 PAGES, 75 AND 50 YEARS AGO

1910: Asquith Needs Labor and Irish PARIS - The most eventful general election held in Great Britain for a century came to an end [on Jan. 29]. Liberals and Unionists practically balance one another, and Liberal Prime Minister Herbert Henry Asquith is dependent for his majority on such doubtful allies as the Labor Party and the Irish Nationalists. At the moment of the dissolution the Liberal Cabinet's platform included reform of the House of Lords and acceptance of the Lloyd George Budget. When the Lords threw out the Budget the Liberal Cabinet had a majority. Now that it has returned dependent on the Irish Nationalists there is little chance of the Upper House showing itself more complaisant. In its struggle to weaken the veto of the Lords the Cabinet can count on John Edward Redmond and his followers, as this would get rid of one of the obstacles to a Home Rule bill.

1935: Senate Rejects World Court WASHINGTON - The Administration suf-

fered its first major defeat from the new Con-gress [on Jan. 29] when the Senate rejected the Robinson resolution providing for America's adherence to the World Court, by a vote of 52 to 36, which was far short of the two-thirds majority required for ratification of the protocols signed thirteen years ago. The vote came as a surprise, as shortly before the roll call Senator George W. Norris (Republican, Nebraska) and other court foes had indicated that their chances of defeating adherence were almost hopeless. A last-minute effort to assure passage of the Robinson resolution was exerted by the Administration, Secretary of State Cordell Hull visiting the Capitol [on Jan. 28] and pleading with opponents to withdraw their objection to the United States entering the Permanent Court of International Justice

# When Opinion Leads, Government Follows

WASHINGTON — On most big issues, government leads and public opinion follows. Certain gut issues have the capacity to turn that process around. We are now witnessing a singular example in the framing of U.S. policy toward fam-ine relief in sub-Sahara Africa.

Until television brought the desperate faces of Ethiopia into American living rooms, it was a case of "out of sight, out of mind." The Reagan administration was maintaining an arm's-length relationship with the Marxist regime in Addis Ababa. The leaders there were de-scribed by Washington as hostile to America and indifferent to their own people. Limited quantities of food were channeled through pri-vate agencies such as Catholic Relief Services, which has worked in Ethiopia for a generation.

All that changed in October when the pictures from Korem, Makale and Bati dominated the daily news. Americans were profoundly affected, and showed their concern through private contributions and requests for more information on the causes of famine in Ethiopia and elsewhere in Africa.

Public opinion began to lead pol-

icy. Washington moved quickly to approve increased aid requests through private agencies, and initiated a bilateral government grant of food. As the news media began reporting from Sudan, Mali, Niger and Mozambique, Washington expanded U.S. aid throughout Africa. Another striking indication that policy is being abaned by public policy is being shaped by public sentiment occurred last week when the Senate Foreign Relations Committee opened hearings on what

By Robert J. McCloskev

more the U.S. government should If, as macro-planners contend. do to aid the famine victims, which is a topic that was not originally on the committee's agenda.

House members who had been to Ethiopia had earlier introduced a bill calling for more than \$1 billion in supplementary assistance, and scheduled hearings for this week. All but two of the 64 co-sponsors are Democrats. Now the Republican side has announced a bill seeking \$628 million. A current administration request calls for \$235 million in new money while re-allocating other Agency for Interna-tional Development funds from ex-isting accounts. Catholic Relief Services and other private agencies believe that the administration's proposal does not go far enough.
The contrast with last year is

noteworthy. Congress then appro-priated \$150 million in supplemen-tary aid after the administration argued that \$90 million was sufficient. The administration went along re-luctantly, but not before it sought to attach an amendment for money for military aid in Central America. The effect was to encumber a "clean bill' that had broad congressional and public support with an amend-ment that had virtually none, and \$60 million in desperately needed African aid was delayed in the pro-cess. If ever an administration was out of step with the will of the people, that was a clear example. In November the Agency for International Development called for a meeting of donor governments as

a way to coordinate responses to

Africa's needs. That was a wise step.

there is ample food to feed everyone on Earth, then the world community is neglecting — or at best dealing inadequately with — its moral responsibility. Thus a meeting of do-

nor governments is a good idea.

But it now appears that Washington prefers to have the United Nations assume the catalyst role. Given that organization's proclivity for politicizing issues, not to mention the fact that the UN General Assembly recently approved \$73 mil-lion to build a conference hall in Ethiopia before addressing the famine, it is difficult to see what it could contribute to alleviating the conti-nent's food problem. It would be more appropriate to get the United Nations to work toward obtaining cease-fires in countries where civil

wars hinder food distribution. The generosity of individuals in

response to the suffering in Africa is unprecedented in modern times. Their help will permit Catholic Relief Services to spend \$15 million on programs in Ethiopia alone.

In Iowa, for example, where farm foreclosures are common, residents contributed \$630,000 recently through a statewide appeal by the Des Moines Register to assist Catholic Relief Services and Church World Service programs.

Public opinion cannot always shape government policy so directly. When it does happen, as it has with the African famine victims, it generally makes good sense. This experience has shown us the kind of values that Americans truly cherish. It is good to be reminded.

The writer, a former U.S. ambassador to Cyprus, the Netherlands and Greece, is senior vice president of Catholic Relief Services. He contributed this comment to the Los Angeles Times.

# They Won't Let the General Show You His Pictures

MONS, Belgium — The commanders at Supreme Head-quarters Allied Powers Europe (SHAPE) think they have the goods on the Soviet Union's dark designs in Europe: Secret aerial photographs from American spy satellites clearly reveal military deployments that can have only offensive, as distinct from

defensive, purposes.

Publication of this evidence, they believe, might work wonders on European public opinion and in turn on

Why? General Bernard Rogers, the supreme allied commander in Europe, would like to know. He has been told that publication of these photographs could compromise U.S. intelligence gathering, but he is puz-zled by the "nuance" between aerial surveillance from fixed-wing aircraft over Nicaragua and satellite surveil-lance of Warsaw Pact deployment. General Rogers is a Rhodes schol-

spending. A bigger European effort army chief of staff. He understands could conceivably silence a growing the problem of the intelligence gatherms of American critics who erers, but he also believes profoundly threaten to pull out U.S. troops if the in the business of balancing risks. allies are unwilling to take on a larger And the "basic challenge we face in this alliance," he told me in a long The Reagan administration, which interview, is to convince the people has not hesitated to use similar aerial particularly in Western Europe, that ireat to their freedom.

General Rogers sees two ominous fused to make this evidence public. power along the European front. The

By Philip Geyelin other is a growing temptation among "serious people, not just kooks," to think in terms of pacifism, neu-

tralism, accommodation.

As these trends converge, he believes Europe might "wake up some morning" and find the Soviets in a commanding position - not to start a war, necessarily, but to subject sus-ceptible Europeans to irresistible diplomatic and economic blackmail

"I'm convinced that the time has come, or passed, for the common good of collective defense, to have a little give on the part of the intelli-

gence community, he says.

Even if he is wrong, the runaround be has been getting from Washington is a commentary on the Reagan administration's management of national security affairs.

The point is not so much whether release of this evidence would do ev-erything the general imagines. The point is that he has been pressing what he thinks is an important case at the highest levels of the U.S. government and even getting a sympathetic he has not been getting is anything in the nature of a considered response reflecting a serious effort to choose between risks and opportunities. In-

stead, intelligence technicians have been bottling up useful and damning evidence at a time when (a) Europe-ans regularly fall short in meeting NATO commitments, (b) the Soviets are moving ahead in sheer numbers of tanks, helicopters and other armaments and (c) Senator Sam Nunn, the Georgia Democrat, is using his considerable prestige to round up Senate support for Grawing down American forces if the Europeans fail to do more in their own behalf.

General Rogers believes that this would be the "unraveling" of the alliance. He sees hard-pressed and in many cases shaky European coalition governments under heavy pressure for social welfare spending. So he would try to strengthen their hand with public opinion.

Many Europeans seriously doubt the numbers — or even the existence — of the Soviet intermediate-range ballistic missiles that constitute the rationale for the hard-won alliance agreement to deploy countervailing U.S. missiles in Western Europe. At least one recipient, Belgium, is having serious second thoughts. General show the sites and even the Soviet

missiles, unmistakably. The European man on the street. he contends, does a lot of wishful thinking about the purely defensive posture of Warsaw Pact forces. "You can show the offensive nature of the Warsaw Pact if you can show the massive amounts of prepositioned river-crossing equipment, the massive amount of prepositioned pipe-line and their ability to lay that pipe-

line up to 90 kilometers a day." He also has photographic evidence of the location and the specific weaponry of Warsaw Pact units. He has tested his theory. With the

permission of Defense Secretary Caspermission of Defense Secretary Cas-par Weinberger he did a slide show for a select group of European cabi-net ministers. "You could hear the breath being sucked in when they saw the pictures for the first time," he says. He believes in it enough to have signed on for another two-year hitch. with the administration's blessing.

Few American authorities question his analysis. The debate is over what to do. And the remedy of choice, increasingly, is to think in terms of threats that the United States will simply walk away from the problem. General Rogers makes a good case that before it comes to that, the administration ought to lay out its best evidence of the Soviet threat and see how the Europeans respond. Washington Post Writers Group.

Letters intended for publication should be addressed "Letters to the Editor" and must contain the writer's signature, name and full address. Letters should be brief and are subject to editing. We cannot be responsible for the return of

The Later
We Retire
The Rose The Better By Giles Merritt B RUSSELS — Early retirement is now one of the most widely used tactics for combating unemployment. It is also folly. Far from returing earli-

er, people should be thinking about

extending their working lives well past their 65th birthdays. Current thinking holds that the middle-aged should "make room" in overcrowded labor markets for unemployed young people. But before long the strongest economic pres-sures will be those directed at keeping people out of the pension queues.

In the last few years the average age at which people retire has dropped dramatically. In Europe to-day something like three-quarters of all employees retire before reaching 65, and a third or more before 60. In America the shift is even more striking: In mid-1984 only 15.9 percent of

men were still working at 65. Statistics indicate that in 1900 twothirds of American men worked past the age of 65. If true, that was probably because there were no pensions for them to go to. But if today we keep on retiring people prematurely we could find ourselves in much the same position, for soon there may not be the pensions to draw on.

For a man to stop working at 55 is nowadays quite normal, and stop-ping at 50 no longer excites comment. Industrial restructuring and the streamlining of 19th century "rust-bowl" sectors like steelmaking and shipbuilding have made early retirement a respectable cuphemism for tossing skilled men in their prime

onto the scrap heap.

With the pressures of rising unemployment—in Europe at any rate. where EC unemployment is 13 million and will go to 15 million at least and maybe even 18 million — early retirement is inevitably seen as a safety valve. It is also widely reckoned a fair technique, as the retirees have enjoyed "their turn to work." while the alternative is for unemployed youth to molder and eventually decay nto a politically volatile workless generation. No one doubts that urgent action has to be taken to ensure that Europe does not create a "lost generation" that will never work. But retiring people early is emphatically not the way. It is arguably creating an even more serious long-term problem than joblessness itself.

Even if people are not pushed into early retirement, the rising proportion of pensioners threatens to bankrupt the rich industrialized countries' pension schemes by the early 21st century. And with early retirement the crunch may instead come before

the end of this century.

Last year the OECD warned its 24 industrialized member countries that by the year 2010 there will be a worldwide pensions crisis and that "the structure of pensions may come in question." For to accommodate the extra millions who by then will be depending on pensions, governments must either pump in much more

money or pay out much less.

The problem is not just that there will be more old people, but also that there will be fewer younger ones to support them. United Nations experts say the over-60s population will have grown 90 percent by 2005 in a world where total population growth will be 70 percent. In other words, in the United States, for instance, therewill be 51 million pensioners by 2020 instead of today's 26 million, and in Japan the position will be worse still. At present, due to World War II

deaths, each pensioner is supported by 15 workers. By 2015, each will be supported by only three. Seniorityrelated pay, meanwhile, will by the 1990s have added a third to Japanese companies' present labor costs.

In short, even a comparatively dynamic society like America's will by 1995 have the age profile that Florida has today. And the cost of keeping a has today. And the cost of keeping a steadily growing proportion of non-working people will be considerable. Europe's governments are well aware that the share of GDP taken by Social Security has gone from 12-18 percent in the early 1960s to 20-30 percent, and that share is bound to rise further. It costs six or seven times rise further. It costs six or seven times more to provide health care for a person past the age of 65.

The outlook for the national pension schemes' finances is also poor, as after the baby boom comes the baby bust; there will not be enough working-age people on present showing to support the elderly. Retiring workers early may seem a

convenient way of wiping them off the unemployment statistics in the 1980s, but it is storing up double trouble for the future.

### Never Heard of Him

William Safire, in his Jan. 14 language column, cites "migraineur." French has "migraineux," meaning "prone to migraine headaches," but "migraineur" doesn't mean a thing. MAURICE WERTHER.

Schaften, Skoff, Scoff

Regarding William Safire's Jan. 7 "Language" column and a letter from J.W. Hemingway (Jan. 19): The word "scoff" was used in

South Africa well before the Boer War. In the semi-desert Karoo region where I was born, food was called "skoff" as early as the end of the 18th century when the "trekboers" still lived in their ox wagons on the veld.

The word was brought to the Cape three centuries ago by Dutch sailors who spoke of "schalten" — to take a noon meal. In forming the Afrikasns language, the trekboers, many of whom were semi-literate, took words from Dutch, German and French, which were then spoken at the Cape, and simplified the spelling and pronunciation. "Schaften" thus became "skoff." The word is still used in the Karoo, where the local specialties are

TURKISH & AMERICA

alled "Karoo skoff."
The word also means a shift isp: called "Karoo skoff." stage or trek, but is then spelled "skof." The trekboer's wife served a meal after each working lap.

MARILYN TOMLENS

and there will be government by continuing resolution until 1986 which is an election year, so ... So let's kill time by reforming taxes. Rub, rub, rub, rub. There. We have erased every line in the wickedly complicated tax code, be-

cause Americans say they crave simplicity. And yet, and yet ...
A few months ago the Reagan administration was said to be bent on establishing a theocracy, turning the government over to the nation's parsons. But lo! The Reagan administration's tax simplification plan would erase the provision whereby parsons are not taxed on the value of the compensation they receive in the form of their parsonage or housing allowance. Taxing that will give the government \$164 million in 1990. But that is \$164 million that congregations will have to make up, or take from charities.

the fear of God into Congress. Furthermore, America itself meaning of course, baseball -- is endangered. Last year 15 million tickets — one-third of all tickets sold — were deductible as business expense. The government in one of its sweeter moods, has declared that a major league stadium is an "ap-propriate business setting." For business entertainment, that is. Change that, and much revenue will be drained from sports. So, sports fans, let's keep a little complexity in the tax code, to protect sports.

So parsons and their flocks will put

down the dusty street — Pennsylva-nia Avenue — but they are not eager to sling guns. The winner may

Now, about that progressive idea of ending the deductibility of mortgage-interest payments on second homes. That change would persecute the plutocrats, right? Well, it will not amuse Aspen, Colorado, Sun Valley, Idaho, and Jackson Hole, Wyoming, for starters. And those states have as many senators as California, New York and Texas. The end of second-home deductibility would alarm the lumbermen who harvest the trees that make the beams and shingles and floors in second homes. And the union members who make the plumbing fix-

tures may oppose any tax change that would inhibit construction. Concerning the three-martini lunch, who will die in the last ditch in defense of permissive rules on the deductibility of "business" meals? Not cats grown fat on too much gin and not enough vermouth. They are too fat to fight. The defenders will be the restaurant and hotel workers' unions. And (for starters) the two senators from Louisiana: New Orleans is kept affoat by deductible spending at business conventions and meetings. Well, at least we can agree about

state and local governments to issue tax-exempt bonds, right? Such bonds finance construction

of public works - schools, highways, airports, hospitals, bridges. There were \$83 billion worth of such bonds issued in 1983. Restrict them and you restrict the wealthamassing by the wealthy. But you also restrict construction, so you will hear from the construction unions (Democratic) and the contractors (Republican), And so on,

So what will happen in this year of budget cutting and tax reform-ing? This year will be momentous if much happens, or if nothing happens. If much happens, that will be momentous. If nothing very much happens, we will have established the momentous fact that the modem state has grown weak by growing big - that it is immobilized by the constituencies it has created through the services it has rendered.

By 1986 we may have the proof that the modern state has so woven itself into the fabric of society that it cannot move without ripping the

fabric, and thus cannot move. Washington Post Writers Group.

Mr. Seaga was seen as a free- On Monday, the Sudan People's Liberation Army, market capitalist who would insurgents opposed to President Gaafar Nimeiri who counter Mr. Manley's Socialism have been fighting in the south since 1983, warned all foreigners to leave southern Sudan to avoid being As it has turned out, Mr. Seaga killed "inadvertently," according to the group's daily radio broadcast from Ethiopia.

Juba is not besieged by the rebels. But their entry into the southern province of Equatoria and their proximity to Juba, its capital, constitutes a new, pivotal phase in the civil war, according to Sudanese and Western residents here.

The rebellion in the south also poses the most serious challenge to President Nimeiri's government since the previous civil war ended 15 years ago, residents say.

third largest recipient in the West- In an interview, Mr. Seaga said General Nimeiri negotiated an end to 17 years of political solution to the civil war is in sight.

General Nimeiri negotiated an end to 17 years of political solution to the civil war is in sight.

General Nimeiri negotiated an end to 17 years of political solution to the civil war is in sight.

So Juba is awash in rumors, and the lack not been tempered by the poor perlesser-developed south greater autonomy and a larger formance of the economy. But be share of the country's resources in 1972, three years U.S. efforts to encourage business added: "We are not a country that after he overthrew the civilian government and took

The rebels argue, and many southerners agree, that skirmishes between rebel and the army.

the government has not kept its word. An irritant has been the government's effort to impose Islamic law on the south, whose population is mostly animist or Christian. Islamic law has not been enforced here and is openly derided by regional officials. Alcohol, for

example, is widely served in Juba. Mr. Nimeiri's division of the south into three reons in June 1983, however, has been bitterly resented many southerners, who see it as an effort to dilutethe south's autonomy.

Moreover, the south has received too little of the country's resources, they complain. The south receives only 5 percent of Sudan's oil imports, economists here

Westerners, regard as an inflexible stance toward the south's complaints.

"Southerners have lived off the cotton produced in the north since 1926," Mr. Nimeiri said in a recent interview. "They have land, water, and resources, but they don't work. Now that we have discovered oil, they say it is ours. I say no, it belongs to the central government, to all Sudan."

With government and rebel attitudes hardening, no

So Juba is awash in rumors, and the lack of facts heightens local tension. At the Greek Club, the Equatoria lun, and Juba's other major bars and restaurants, the remaining foreigners swap information, much of it inaccurate, about road closings, rebel sightings, and than a dozen armored personnel vehicles have been deployed at an army base near the bridge to help defend Juba in case of an attack from the east bank, where rebels have recently made inroads.

For the past month, the Sudan People's Liberation Army broadcast has reiterated its intention to take Juba, compounding anxiety in this city of 190,000. Most residents here say the rebels would not try, nor would they be able to, take Juba, for reasons that

illustrate the war's politics. Equatoria's various tribal groups have been cool to the rebels, because most of the Sudan People's Libera-Mr. Nimeiri has taken what southerners, and some tion Army, including its leader, Colonel John Garang, a U.S.-educated army defector, come from the Dinka

tribe. The Dinka, mostly from the Upper Nile and Bahr al-Ghazal provinces, comprise almost 2 million of the south's six million people. The military sitution is clouded. Brigadier General Osman Abdullah, director of operations of the Sudanese Air Force, said that Colonel Garang had about

3,000 to 6,000 of his 10,000 to 15,000 soldiers in Equatoria. Three weeks ago, the army began an offensive against them, he said.

Major General Babikir Abdul Raheem, spokesman for the government forces, has said that the government had successfully engaged the rebels in early January at Terakeka, about 50 miles (80 kilometers)

Jittery soldiers guard a bridge across the Nile. Two ment, the army destroyed at rebel base at Winjibull tanks are dug in along the west bank of the river. More near the Ugandan border.

But some residents expre ss coracern about the army. They say the war is unpopt that with the soldiers, many of whom are northerners.

Of particular concern was a rebel ambush of an army company on Dec. 2 5 at Malek, a town near Bor. about 100 miles north o' I Juba. The army completely lost its cohesion, according to authoritative accounts.

# Dole and Lugar: New Leaders Steer Senate Back Into Foreign Policy

By Helen Dewar

ASHINGTON — Despite loyalty to the Reagan administra-tion's global goals, the new Republican leadership of the Senate is showing a streak of free thinking in the senate is showing a streak of free-thinking independen revive the Senate's role as a powerful force in shaping U.S. foreign policy.

The two central players, Robert J. Dole, of Kansas, the majority leader, and Richard G. Lugar, of Indiana, the chairman of the Foreign Relations Committee, have already pointed the Republican-controlled Senate down paths that could force change at the White House, Pentagon and State Department.

Senator Dole has been pushing a deficit-reduction plan that would deeply cut if not freeze President Ronald Reagan's costly military buildup, possibly further jeopardizing such weapons programs as the

Senator Lugar has declared that covert U.S. aid to anti-government guerrillas in Nicaragua is no longer "viable" and pronounced the program to be virtually dead in Congress.

Moreover, both Mr. Dole and Mr. Lugar have put emphasis on

incependent initiative that is at least partly aimed at reviving the Senate as a creative national force in foreign policy. Such initiative was last seen when former Senator J. William Fulbright, an Arkansas Democrat, he aded the Foreign Relations Committee during the ferment over the

R estoration of bipartisanship in Senate handling of foreign policy is

anot her key goal,
"I would like to have people in the future look back at this Congress an d sa y that it made a major effort to reinstill a bipartisan spirit in our con side ration of foreign policy issues," said Mr. Dole in answer to a quest on about his top priority for the session.

He non ed that the first substantive act of the Senate after it convened Jan. 3 was passage of a bipartisan resolution commending the administration's efficient to resume arms control negotiations. At the Democrats' insistence, to be resolution included the appointment of official Senate "observers" L 2 monitor the talks.

In an interview, Mr. Lugar emphasized the fact that he and Mr. Dole have been admi nistration loyalists, but he used this fact to indicate they can be expected to act independently of the White House when administration and Senat e priorities are at odds. We are both s.upporters of the administration but because of this

loyalty we both have an opportunity and obligation to speak out in independent ways," aid Mr. Lugar. He subsequently proved the point in a speech to the National Fress Club that posed questions about some of the most basic tenets of U.S. foreign policy.

Neither Mr. Dole, 61, a 24-year congressional veteran, vice presidential candidate in 1976 and I ikely contender for the Republican presidential continuing in 1988, nor Mr. Lugar 52, a foreign manage of Indiana.

tial nomination in 1988, nor Mr. Lugar, 52, a former mayor of Indianapolis who has served in the . Senate only eight years, has any extensive experience in foreign policy.

Their concerns have been n vainly on the domestic front, although their preoccupation with economic policy, trade, agricultural and industrial issues — and in Mr. Lugar's c. ise, intelligence problems — gives them a perspective that is bound to i niluence their approach toward foreign

OTH are political centria its, pragmatists rather than ideologues, Midwesterners who fit in either the mold of the liberal Eastern establishment nor the New Right conservatism within their party. While their basic political philo: sophies and world views are distinctly compatible, they differ in style.

Mr. Dole is a bold, even daring les vislative charger, gregarious, energetic and witty. He has a reputation of baving been a "batchet-man" of the Republican Party, but he now comm ands wide respect on both sides of the aisle. Chosen over four rivals — i n part occause of his personal and political dynamism - he has elect rified Senate Republican ranks, although his leadership remains untes, ted in actual votes.

By contrast, Mr. Lugar is reserved an d cautious, a Rhodes scholar with a keen, analytical intellect but little pretentiousness about his wellregarded skills at mastering difficult issuies and forging coalitions to deal with them. He is known for plucking compromises out of difficult situations — ranging from the New York City and Chrysler Corp. financial bailouts in the late 1970s to a procedural accord last year on monitoring the CIA. He has, said an admiring aide to another senator, a

In terms of policy differences, Mr. Lug ar has spoken of the need to continue the Reagan administration's military buildup regardless of

Senator Robert J. Dole: Pushing deficit reduction.

success or failure in arms control talks, while Mr. Dole has led the charge for across-the-board spending cutbacks, including in the military. But this may stem as much from their disparate roles as from any fundamental policy difference; they appear to work well together, and Mr. Dole has delegated chief responsibility for foreign policy issues to Mr. Lugar.

On basic policy, Mr. Dole and Mr. Lugar are expected to depart little from their script of their predecessors: Howard H. Baker Jr., of Tennessee, the majority leader who retired to consider a possible bid for the presidency, and Charles H. Percy of Illinois, who was chairman of the Foreign Relations Committee when he was defeated for re-election.

But Senator Percy tended to be more of an outspoken arms-control advocate than Mr. Lugar, at times crossing swords with the administration on the issue. And he generally tended toward more liberal positions than the Republicans as a whole in the Senate, making it difficult to forge a majority within his party. This factor contributed to the stalemate over foreign-aid authorization bills in three of the four years of President Reagan's first term. Senator Baker often assumed command of foreign policy issues when they reached a critical point.

Mr. Dole and Mr. Lugar opposed the SALT-2 treaty but backed the Reagan administration's strategy for moving to arms reduction talks, including the Space Defense Initiative, or SDL

"SDI has already made its first contribution to arms control" said Mr. Lugar in his Jan. 23 press club speech. "The Soviet Union is back at the negotiating table. We should not expect the SDI to do too much too quickly, but we should be prepared for the fact that this research effort is

here to stay and that its consequences will be great."

Both sided with the administration in opposing the move last year by Senator Sam Numn, a Georgia Democrat, to reduce U.S. troop levels in Europe unless NATO countries meet their financial commitments for support of the alliance. But they also contend that more burden-sharing

"Very frankly the Nunn amendment was a good thing as long as it didn't pass." Mr. Dole said recently. "Perhaps it has helped convince our NATO allies that we have a real problem on burden-sharing and that we in the United States take that problem very seriously."

Neither Mr. Dole nor Mr. Lugar figure in the strong trade protection-

As a Kansan, Mr. Dole has a strong interest in grain exports, which showed up in his vociferous opposition to the anti-Soviet grain embargo. Even though Indiana is a major steel-producing as well as agricultural state. Mr. Lugar has taken a lead in opposing quotas on steel imports and generally regards himself as a free-trader, although he recently endorsed continued restraint of the importation of Japanese automobiles.

Mr. Dole, however, has warned that protectionist pressures may gain in Congress unless obstacles to U.S. exports are removed. "Protectionist pressures here can be contained only if those industries now in ascendan-- like agriculture, telecommunications, advanced electronics and services - are allowed fully to compete in export markets." he said.

N broad terms, Mr. Dole has put his foreign policy priorities in these terms: "First, I think we need to make sure that our relations with our allies are in good order. We've got to keep the NATO alliance in good shape, keep pushing on burden-sharing — without being threaten-ing — and doing what we can to resolve differences among individual ing — and doing what we can to resolve differences among individual NATO members. We've got to make some progress with Japan on our trade imbalance, so that doesn't disrupt what otherwise is a very sound and mutually beneficial relationship. We've got to continue our support for Israel without forgetting the legitimate interests of our other friends in the Middle East.

"Second, we must follow through vigorously — as I know the administration intends — to seek effective nuclear arms control agreements with the Soviets. That's almost certainly going to be a long, tough, sometimes frustrating process, but we've got to try.

"Third, we should take a fresh look at a number of the regional trouble spots that we've been dealing with over the last few years — the Middle East, southern Africa, Afghanistan and South Asia . . .

"It may be that we will decide that what we're going on these issues is about right and we shouldn't change. But on some of them, I expect, a fresh look might allow us to better focus on our current goals and give us some fresh ideas about how to achieve these goals. And perhaps I should include here as a separate high priority doing something about the African food situation, though I regard that as much more of a humanitarian than foreign policy issue."

Mr. Lugar sketched out his concerns in a more philosophical vein in his press club speech, which was largely devoted to a lack of consensus over critical foreign policy issues in the United States, especially since the

In the aftermath of Vietnam, he said, "The United States has been and continued to be uncertain about the use of force in the conduct of American foreign policy. A broader popular involvement in foreign policy questions has deepened the historical reluctance of Americans to employ force to achieve our national purposes."

In poll after poll, he continued, "Americans express their concern about hostile governments which imperil our interests in Latin America and elsewhere. But in these same polls, Americans display an equal and overwhelming opposition to any course of action which might actually

frustrate governments which are harmful to us."

Then he asked the following questions that are expected to be central to his reappraisal of U.S. foreign policy, starting with five or six weeks of wide-ranging, hearings that begin Jan. 31.

"Do we really have vital interests all around the globe?" he asked, without pretending to have the answers. "Do we have the economic and military capabilities and the political will to support these interests with a safe margin of risk? Do we have a long-term, substantial and correct view of the Soviet Union. Do we have an appropriate understanding of the economic, political and spiritual forces that move nations?"

Senator Richard G. Lugar: Against covert aid to rebels.

# Scientists Clash Over Space Defense; Some See 'Promise,' Others 'Tragedy'

By Henry Tanner international Herald Tribune

ERLIN — Albert Einstein was a lifelong Beginst. But when he was told that Nazi Germany was close to developing an ing to President Roosevelt, urging him to take "quick action" in atomic bomb research. After Hiroshima, Mr. Einstein became a fervent advocate of world government as the only way to

Prevent a nuclear holocaust.

Robert J. Oppenheimer was in charge of the Manhattan Project, which produced the first atomic explosion. A few years later, with other U.S. scientists, he passionately opposed build-

ing the hydrogen bomb. Today, scientists again are fervently taking

The issue now is President Ronald Reagan's Strategic Defense Initiative, popularly known as "star wars," which many scientists say raises military, scientific and moral questions of a magnitude comparable to those resulting from presidential decisions on the atomic bomb.

Mr. Reagan's space defense system could bring vital changes in the "balance of terror" between the United States and the Soviet Union, Many think it could be decisive in making or breaking East-West negotiations on nuclear arms control for the next 50 years and determine the question of war or peace, even human survival.

A roundtable of about 20 U.S., Soviet and European scientists and officials early this month conveyed an impression of how these men talk among themselves when they argue about the "promise" or the "tragedy" inherent in the U.S. plans. The symposium was held at the Aspen Institute in West Berlin.

The discussions were polite - first names were used, almost exclusively - and the passions were reined in. But the disagreements over "star wars" were fundamental.

The U.S. program calls for \$26 billion to be spent in the next five years on research to develop a space-based, anti-missile system that, if effective, would make the arsenal of Soviet intercontinental ballistic missiles obsolete.

TEROLD Yonas of the Pentagon, the scientist in charge of the Strategic De-fense Initiative research program, and Gilbert D. Rye, director of space programs for the National Security Council, argued strongly for the program. Other U.S. and European scientists questioned its feasibility as well as the American effort" with countermeasures, he basic political and strategic assumptions behind

Mr. Yonas asserted that the development of a "credible" U.S. space defense against ballistic missiles would leave the Soviet Union with few options and would induce them "to discontinue further investments in offensive nuclear weap-ons and to abandon their strategy based on a first-strike capability."

The challenge is to develop technologies "far ahead of any possible response." Mr. Yonas said. "This is the essence of our research pro-

He said there would be dramatic innovations in the next five years and that deployment of the space defense system could begin "within the

No one at the table questioned the need for U.S. military research in space. The fact that Moscow, too, is engaged in such research was not denied by the Soviet participants. But the U.S. scientists present who were not

connected to the Reagan administration argued that anything short of a "perfect" space defense system not only would fail to deter the Russians from building more ballistic weapons but would actually compel them to build more and destroy, perhaps forever, the hope of any agreement on nuclear arms control.

They criticized U.S. civilian leaders, notably President Reagan and Defense Secretary Caspar W. Weinberger, for holding out the impos-sible promise of a "perfect" defense.

"To make nuclear weapons truly obsolete is totally unrealistic, a fantasy," said Jack Ruina, a professor from the Massachusetts Institute of He also had a solution for disposing of nucle-

Technology.

He spoke of "the fallacy of the last move," the idea that U.S. weapons technology could achieve something so final that the other side would never be able to make a countermove.

"Let's put it on the backside of the moon," he said. "Ten thousand years from now people will say, 'This is exactly what we need,' and the technology for putting it there is no problem."

"This is as far from reality as putting a man on the sun or building a bridge to the moon," Iserland, introduced hims Mr. Ruina said. He said that the arms race has earning a living in space." shown that there is an answer to every new step one side may take, and that each adversary can build improved offensive weapons to overcome the other's defensive system.

Several participants pointed out that the United States would probably be forced to test its space defense weapons at an early stage of their development. Such testing is prohibited under the 1972 anti-ballistic missile treaty with the Soviet Union. The U.S. would be forced to violate the treaty, they argued, making future

arms talks virtually impossible. The tragedy would be if we killed all chances of an arms agreement only to find out that there is no such thing as an effective missile defense," said Paul Doty, the professor in charge of the Department of Science and International Af-

Several scientists proposed research on a limited space defense system aimed at intercepting

.. U.S. scientists argued that anything short of a "perfect" space defense system would fail to deter the Russians from building more ballistic weapons.

some but not all Soviet offensive weapons. Some asserted that the technology for such a limited objective either exists or could be developed

Alexei A. Vasilev, the principal Soviet participant and a leading member of the Soviet Academy of Sciences, said that, as a scientist, he would be inclined to ignore the U.S. space defense initiative as unrealistic. But, he said, as a political leader responsible for the security of his

country, he could not.
"We will be watching carefully, and I am sure that our industries will be told to match the

N another subject, scientists pursuing civilian scientific and economic goals laid out ambitious plans of their own for the future of the space age.

"Next we will have to see whether we can go to the nearest star," said Roger Bonnet of France, who is in charge of scientific programs at the European Space Agency.

"We have been looking at Jupiter trying to understand how a thunderstorm is working there, and that's really amazing because we don't even know how a thunderstorm works on Earth," he said,

The moon is the "Panama Canal leading to Jupiter," said Heinz-Hermann Kölle, the director of the Aerospace Institute of the Technical University of West Berlin.

Mr. Kölle and others agreed that the moon must be turned into a "staging area," with a permanent installation there serving as headquarters, base camp and refueling station from which it would be possible to "go almost any-where in the solar system, including Jupiter." They explained that the moon can be reached

with existing shuttle engines and that it can provide the oxygen that accounts for seveneighths of the fuel needed for "connecting lights" to other bodies in the solar system. Mr. Kölle expects the Earth's present population of 4.8 billion to double in 50 years. That

ficed to military objectives.

participant noted.

Mr. Yonas, the Pentagon scientist, countered that about half the funds spent on research for a

41.14

"In some areas, space industries can live on their own and be self-earning," he said. "We self launchers the way other people sell aircraft; we compete with NASA for each customer, just as Boeing and Airbus and others compete for each sale of a plane." RIANESPACE, the marketing arm of the

A European Space Agency that was started in 1980, oversees the production of rocket launchers by 35 industries in 11 European countries. It does not produce satellites.

When somebody tells us he wants to have a satellite launched, we order the launcher and conduct the launching operation." Mr. Iserland

He estimated that the world market for launchers and launchings would be between \$1 billion and \$2 billion a year for the next 15 years, and that Arianespace would get between 33 and 40 percent of the business. The rest will go to the National Aeronautics and Space Administration or to private industry in the United States after the U.S. space agency drops the Atlas Centaur and Thor Delta launchers, as it

has decided to do.

Mr. Iserland said that the world market for satellites would be between \$3 billion and \$6 billion a year for the next 15 years.

Caesar Voute, a professor of geology and a specialist in remote-sensing programs from the Netherlands, made an impassioned plea to the hi-tech nations to develop and finance the distribution of space technology that could serve Third World countries.

Although the Earth now can be observed from space, he said, geological mapping in many parts of the world is still at the level used by the Egyptians 3,000 years ago.

He described an experiment in which soil-

moisture measurements obtained by satellite have been turned over to a station in Niger where they are being used by African farmers stricken by drought.

Bad weather may be only an inconvenience to

some people, he said, looking out on Berlin's frozen Wannsee, but it may make the difference etween life and death in many parts of the world unless the rich nations step in with the latest technology.

In the 27 years since the Soviets launched

their first Sputnik, space has become so overcrowded that flight paths of U.S. shuttles must be charted to avoid collision with about 5,000 other orbiting objects, according to Mr. Doty.

A recent shuttle passed within 14 kilometers (8.6 miles) of a satellite as both were traveling at a speed of about 10 kilometers a second, he said. The observation port of another shuttle was hit

by an small object. . Of 14,000 objects launched into space since the first Sputnik, about 9,000 have fallen to Farth or burned up in the atmosphere. That leaves 5,000 still in space, he said, about the same number as there are ships on the world's seas on any given day 3,000 years after man first started sailing.

Some scientists at the meeting said they

feared that military men were gaining more and more influence on space policies both in the United States and in the Soviet Union, and that scientific research would be increasingly sacri-

NASA, until two years ago, received a greater share of the annual federal budget than did the military, but this trend has been reversed, a

population will require much more energy and, space defense system also serve civilian uses. he said, solar power stations in space are possi-

# Ungaro, Chanel Turn Out Gems

By Hebe Dorsey International Herald Tribune

DARIS — Tuesday was a good I day for Paris couture, with cut pantsuits in gray or white. The Emanuel Ungaro and Karl Lager. look was unmistakably his. with feld (for Chanel) delivering creme de la crème collections. The clothes looked like jewels and the feeling of luxury was supreme.

### PARIS FASHION

Alexandre chignons were divine and the coifs by Jean Barthet out of a fairy tale, Barthet, an artisan from the old couture days, stayed up two nights to glue pearls and sequins onto these coils. Chanel was also exceedingly quality-con-scious, with pearly makeup matching the 18th-century pastel silks.

Although these clothes are supposed to go to a limited, almost confidential audience, couture is beginning to attract the trade as well. Sonja Caproni. in charge of fashion for 1. Magnin of San Francisco, attended all these collections, "I like them better than ready-to-

wear." she said. a red cardigan over a purpley dress and Marie-Helène (Bootsie) Galbraith was in a cheery green. Lynn Wyatt of Houston, whose husband is an oil tycoon, was in petrol blue, and the Brazilian Carmen Mayrick-Vega had on a hot-pink coat. Isabelle d'Ornano's red stockings

matched her bag and sweater. None of them, however, came turquoise, yellow and pink, but the

Ungaro also showed stunningly pants cut on the bias and important but softly gathered sleeves. The updating came from simply cut, lightly embroidered. V-neck blouses. Perfection was carried out in the smallest details. At Ungaro, the PARIS FASHION

PARIS FASHION

Jackets stopped either at the waist or on the hips, where they were strongly draped. The new lapels were huge and floppy. When Ungaro mixed gray and white, it was

quite pretty. The most significant new look at Ungaro was a short and flirtatious little dress, draped within a millimeter of the figure and with a rose planted smack on the derriere. His strapless dresses were often decorated with long shawls, draped around the neck and ending in a big silk tassel.

Most of the evening dresses were short and sexy, except for some complicated, vaguely Ballets-Russes concoctions with much too much going on. But Ungaro said he had to have a little fun.

At Chanel, Lagerfeld did a Watteau look, inspired by the recent At Ungaro, the first row told the Watteau exhibition at the Grand story: color, color and more color. Palais. Lagerfeld has always been Marie-Helène de Rothschild wore an 18th-century fan; he has worn his hair in a ponytail for years and both his Paris apartment and his Brittany chateau are crammed with 18th-century treasures.

He is not the only one wearing a ribbon in his hair these days. The Grand Hotel salon, where the show was held, was full of ribbon bows; Princess Caroline of Monaco's was in brown velvet. Watteau and Chacombat the mad dog of history. But anywhere close to the brilliancy of nel may sound like oil and water, despite very good performances. Ungaro's palette. His opening trio and white ruffles may come as a from Stephanie Fayerman as the consisted of very short suits in par- shock to Chanel lovers, yet Lagerfeld made it work, especially in a navy and white Pierrot suit that is sure to become a best seller. The Watteau notes included the decor, with a backdrop of forest and statnary painted by the stage set designer Claude Maury.

There were big satin berets, courtier's satin costumes, shoes decorated with ribbon cockades and 18th-century colors such as lime and ice blue together. At the end, a group of Petit Trianon milkmaids reproduced the period look to the smallest detail, including crushed roses in the hair and stiff petticoats under full skirts cropped above the ankie. This worked only on the prettiest and youngest mod-els; everybody else looked like dec-

Lagerfeld also had a lot of breadand-butter suits, changing the particularly good new one). The ing to see several collections and Chanel length is no longer with us, visiting the Louvre and Versailles.

Ungaro's criss-cross draping.

and Lagerfeld is playing around with hemlines, including some well below the calf. This was particularly pretty in a huge jersey coat with trenchcoat epaulets.

Nobody need worry about the future of this house, whose bottom line evidently reads like a gold mine's. Marie-Louise de Clermont-Tonnerre, spokeswoman for Chanel, would not reveal the 1984 figures except to say that they had doubled, for both couture and ready-to-wear, from 1983's results. A new Chanel boutique opened in Hawaii last fall and one is opening on Los Angeles's Rodeo Drive in

With scores or rich and elegant women in town, Paris is in a festive mood and all kinds of parties are going on. But the nicest, held Mon-day night at Maxim's, went virtually unnoticed next to the big bash given there at the same time by the house of Dior. No princesses here: just 35 starry-eyed students, quite a few of them from the University of Delaware, who were celebrating the conclusion of their fashion and interior design programs at the Paris American Academy. Their host was the school's director, Richard Roy, who said that in addition to shoulders here (bigger and broad-er) and the sleeves there (with a [group] rate") the students were godining at Maxim's ("They give us a

# Cottesloe's Medieval Mystery Plays Are a Breathtaking Vision

# Dow Sets a Record at 1,292.62 United Press International NEW YORK — A powerful upward move in the last 30 minutes of trading took the stock market to record heights Tuesday. Many of the 30 blue chip stocks in the Dow Jones industrial average had gains of 1 point or more as the index surged 14.79 to an all-time high of 1,292.62. The previous record was 1,287.20, set Nov. 29, 1983. The Dow Jones transportation average rose 7.20 to 614.37, also an all-time high. Advances outnumbered declines by a 2-1 ratio. That set a modern record of 17 consecu-

7.20 to 614.37, also an all-time high.

Advances outnumbered declines by a 2-1 ratio. That set a modern record of 17 consecutive sessions of advances leading declines.

Volume was 115.73 million shares, down from 128.41 million traded Monday.

Newton Zinder of E.F. Hutton Co. said the stock market "just doesn't want to go down. It absorbs any selling easily and the path of least resistance is pointed upward."

He said the market has enough momentum to take the Dow industrials to the 1.320-1,340 area without much trouble in a week of so.

without much trouble in a week or so.

The stock market had been lower through most of the day although the deficit was small with 30 minutes of trading left in the session.

Jerry Hinkle of Sanford C. Bernstein Co. said there was evidence of short covering in the final hour. He said reports of organized-buying pro-

grams by large investors sent short sellers "running to cover."

In a short sale, traders sell borrowed stock in hopes the price will fall. If the market starts to go up, they sometimes cover their positions. Two broader stock market averages which hit all-time highs a week ago and have been hitting new records in almost every session since did the same thing again.

Merrill Lynch, a strong gainer recently be-cause of increased stock-market volume, gained 1% to 34%. Paine Webber advanced 2% to 38. IBM added 2% to 137, Digital Equipment 1% to 121%. Hewlett-Packard 4 to 37 and Texas Instruments I to 130%. 12 Month

# **More European Executives** Move Into Top Posts in U.S.

INTERNATIONAL MANAGER

By SHERRY BUCHANAN

International Herald Tribune

EW YORK — Increasing numbers of European executives working for American companies overseas are finding that their corporate horizons are no longer limited to the subsidiary itself. In the past 10 years, U.S. companies overseas have increasingly replaced American managers with Europeans. These Europeans, in turn, are now moving into top slots at the parent corporations.

Still, the numbers are small. If there are barriers to the No. 1

and No. 2 corporate slots, they seem to be the same for all executives regardless of their passport. Senior executives point out that there isn't much room at the top in the first place. "We must be rather a small club of Europeans at the president

level of U.S. corporations," says J.P. van Rooy, the Belgian

A still small, but

growing, number of

Europeans occupy top

president of Carrier Interna-tional, a subsidiary of United Technologies Corp. "I wouldn't say it was difficult for a European. There are just very few seats at the top."

The small club of Europe-U.S. corporate posts. ans occupying the top two spots at major American companies includes Harry Taylor, president of Manufacturers Hanover Trust, who is British; Den-

nis Weatherstone, executive vice chairman of Morgan Guaranty, also British; Anthony J.F. O'Reilly, chief executive officer of H.J. Heinz Co., from Ireland; Michel C. Bergerac, chairman and chief executive of Revlon Inc., from France, and Pierre Gousseland. chairman of AMAX Inc., the big metals concern, also from

In comparison, there are hardly any Americans heading large European companies. Foreign accents, for one, do not seem to be a problem in U.S. boardrooms. "I could never manage to lose mine," says Mr. Bergerac of Revion.

Most of the executives that have made it in the United States started out one of three ways. A few, of course, have arrived from the European subsidiaries of U.S. companies. Some came to the United States during World War II and planned U.S. careers from the outset. Others arrived on scholarships, and stayed on to

Mr. Bergerac, for example, who came to the United States on a Fulbright Scholarship, spent a year working on farms and ranches. "It wasn't a conscious decision," he says of his decision to join Cannon Electrical, a California-based company that was later bought up by ITT Corp. "Getting the opportunities is what is important here. Unlike in Europe, youth is considered a virtue."

LEARLY, there is no major trend under way; European executives are not swarming into the country to full top U.S. corporate positions. For one thing, U.S. companies who do not wish to promote from within typically look for talent among competing U.S. companies in their industry. "A client among competing U.S. companies in their industry. "A client wouldn't want us to look outside the United States until we exhausted our search in the U.S.," said Mike Hyde, a partner with the executive search firm of Egon Zehnder in New York. "Seldom will a U.S. company, for a top position, say I want you to look around the world."

For most Fortune 500 companies, the U.S. market is still the primary source of management talent. "If you get a very large corporation with 27 local managers, it doesn't mean there is a 27to-I chance that the CEO be a foreigner," said Alexander Brody, the Hungarian-born president and chief executive of Dentsu Young and Rubicam Inc., a major advertising company. "But it's not impossible to make it. Of course manufacturing companies will look for their people where business is large."

Although there are no available statistics for the number of European executives employed by U.S. corporations, Brooks Chamberlin, vice president of Korn Ferry International, the executive search firm, suspects there are more Europeans in U.S. service businesses - banking, insurance and management consulting - than in manufacturing. "In the service industries the

# U.S. Steel Rebounds In 1984

\$493-Million Net After Loss in '84

PITTSBURGH - U.S. Steel

Corp., the leading American steel producer, reported Tuesday 1984 profit of \$493 million, compared with a loss of \$1.16 billion in 1983. Earnings per common share were \$3.52 for 1984. Sales reached \$19.1 billion for the year after \$17.5 billion in 1983.

The company's fourth-quarter profit was \$29 million, or a loss of 1 cent per common share after ac-counting for dividends on pre-ferred stock. Sales for the quarter were \$4.7 billion.

In the last three months of 1983, U.S. Steel had a loss of \$983 million on sales of \$4,7 billion.

In steel and related resources, the company had a \$752-million turnaround during 1984, posting annual operating profit of \$142 million after a loss of \$610 million

A major U.S. Steel subsidiary, Marathon Oil Corp., posted operating income before foreign income taxes of \$1.27 billion on sales of \$10.2 billion last year, compared with nearly \$1.14 billion on sales of

\$9.3 billion in 1983. "We expect another profitable year in 1985, with continued emphasis on debt reduction and operating efficiency," David M. Roderick, the U.S. Steel chairman, said in

Mr. Roderick called the annual earnings "especially satisfying" in light of sagging demand for steel and lower oil prices.

"These results indicate the success of actions taken during the past three years to diversify, restructure and streamline our operations." he said.

■ Preliminary Steel Ruling

The U.S. International Trade Commission has made a prelimi-nary ruling that allegedly unfair imports of steel from countries in the Eastern bloc and elsewhere were harming American producers. Reuters reported from Washing-

In initial votes, the commission ruled Monday against steel prodthe Communist nations of Cze- in December from the previous gary, Romania and Poland.

In complaints filed with the commission, U.S. Steel, Bethlehem Steel Corp. and Chapparral Steel Co. charged that the steel was either illegally subsidized or sold at

The Commerce Department must investigate further to determine if there were violations.

Lou Guoji, general manager of the privately owned Minsheng Shipping Co. in China.

# In China, an Improbable Comeback

By John F. Burns New York Times Service

CHONGQING, China - Each morning at daybreak, a group of old capitalists gather in a drafty warehouse in this port city to plot a little competition for the state-owned shipping company that more or less expropriated the Yangtze River 30

Long before the mists lift from the old Chaotianmen port, where freight still moves on shoulder-poles and barges rest on mudflats at low tide, work is in hand on an improbable comeback. Minsheng Shipping Co., lion of the Yangtze before the Communists came to power in 1949, has risen from oblivion to challenge for cargos once again.

From nothing a few months ago, Minsheng has already started to stir the muddy waters around Yangtze River Shipping Co., the state-owned giant that dominates the 1,800-mile (2,880-kilometer) river. The privateer's barges and tugs are winning contracts with lower tariffs, well-drilled crews and on-time deliveries. Local shipyards are working around the clock to expand its fledgling fleet, and the first profits are starting to show.

For Lou Guoji, the company's 61-year-old general manager, it is the realization of a dream. The company, started in 1926 by his father. Lou Zuofu.

grew over time until it employed 8,000 workers. It helped keep Nationalist China alive by running the gauntlet of Japanese bombing during World War II. The older Lou was called a patriot by Mao Zedong, but in 1954 his 148 vessels were seized with the comparation and Mischand dishaded. without compensation and Minsheng disbanded.

But now, under China's new leadership, competition and profit are back in, and survivors of the property-owning class are being asked to brush up old skills. Banks that have been sitting on expropriated millions are eager to lend some back to new usinesses with the old entrepreneurs.

"Just like my father, I intend to see that this company is the best and most efficient in China," Mr. Lou told a visitor as they walked out to a barge sitting below the towering gorges where the Yangtze and Jialing rivers meet.

We will give the state-owned companies the competition they need to shake them from their 'iron-rice-bowl' mentality, where everybody has a secure job no matter how little he does."

As China's leadership prods the entire country into an experimentation with capitalist economics, Minsheng is the largest and most famous old company to make a comeback. It is a modest business so far with two tugs and seven barges,

# **Key Index in Japan Rises Sharply**

TOKYO - Japan's index of leading economic indicators rose sharply in November to its highest level in eight months, the Economic Planning Agency said Tuesday. The agency said the increase was a sign that the Japanese economy

probably would strengthen in the next few months. in a separate report, the governucts from Austria, Sweden, Norment said production at Japan's way and Venezuela as well as from factories and mines fell 0.4 percent

> But despite the decline, Japan's industrial production climbed 11.2 percent during 1984, the largest annual increase in 11 years. Production had risen 3.6 percent in 1983, the government said.

prices below fair-market value.

45.8 in October and 66.7 in Sep-

March. The index has 12 economic sta- More Orders Received tistics, including overtime worked. machinery orders, production effi-

ciency and the Tokyo Stock Exchange index. The agency considers any readnomy is still expanding. It had previously described Oc-

porary dip. The decline in industrial production in December followed a revised 0.3-percent gain in November, the Ministry of International

Trade and Industry said. In its report on leading indica-A ministry official said the tors, the Economic Planning Agen-cy said the index rose to 75 in month-to-month decline reflected November, the latest month for a slowdown in exports of electric which figures are available, from machinery and other products.

The double-digit industrial production gain for all of 1984 was The agency said the November largely the result of increased proreading was the highest since duction of electric machinery, the official said.

Japan's Construction Ministry said Tuesday that orders received by major Japanese construction firms rose to an unadjusted 9,617 billion yen (\$37.86 billion) in 1984 ing above 50 to mean that Japan's from 9,475 billion yen in 1983, Reuters reported from Tokyo.

The ministry said that the 43 maior companies received 3.2 de cent more orders in December than November, at a seasonally adjusted 794.16 billion yen from an upwards revised 754.83 billion yen.

The November figure was originally reported at 750.72 billion year Unadjusted, December order were down 2.2 percent from a year earlier, after a revised 8.8-percen year-to-year November drop.

# **Productivity** Of U.S. Business **Rose in 1984**

WASHINGTON - The productivity of America's nonagricultural business rose 3.1 percent last year, reflecting a booming economy in the first half of 1984 and an encouraging year-end recovery, the Labor Department said Tuesday.
The rise was less than the 3.5-

Nonetheless, it reflected an economic resurgence since the recession of the first two years of the Reagan administration, the Bureau of Labor Statistics said.

The bureau's productivity index rose 1.5 percent in 1981 and 0.2 percent in 1982.

Productivity is a measure of the volume of goods and services the

economy puts out in an hour of paid working time. In the nonfarm business sector in 1984, output grew 8.5 percent and hours worked rose 5.2 percent. The increase in nonfarm output was the largest since 1950 and the increase in hours was the biggest since the Labor Department began collecting the information in 1947.

Including the volatile agriculture sector, all business productivity rose 3.6 percent in 1984 over 1983, the largest jump since the 3.6-per-cent increase of 1971.

Output in 1984 including agriculture rose at 8.8 percent, the fastest rate in more than 30 years. A 5percent gain in hours was the

largest recorded since 1947.
In the fourth quarter, nonfarm productivity was up 1.7 percent, while in the third quarter it had declined 1.1 percent in a slackening economy, the bureau said.

"The fourth-quarter figure was a very positive one given a fairly sluggish performance for the economy," said Allen Sinai, chief economist and managing director of Shearson Lehman/American Ex-

Of significance to analysts were nonfarm unit labor costs in the fourth quarter, up just 1.8 percent from the previous three-month period, when they jumped 4.7 per-

The fourth-quarter growth in nonfarm productivity was the main factor in lowering labor costs. "We've really locked in low in-flation," said Edward Yardeni,

chief economist for Prudential-Bache Securities. "Business has come to terms with labor to slow labor costs."

Hourly compensation last year went up 4.7 percent, the smallest increase since the 3.4-percent increase in 1965. Mr. Sinai said the performance of productivity growth in 1984 "au-

gers well for continuing low infla-The fourth-quarter performance "is a surprisingly good one," said Thomas D. Thomson, senior vice president and chief economist at Crocker National Bank in San

Mr. Thomson said the prospects for controlling inflation remain bright because of productivity The rise was less than the 3.5percent increased recorded in 1983, and commodity prices plus slower

growth in compensation rates.

Productivity in the manufacturing sector last year was up 4.7 percent, the biggest one-year gain since the 5.4-percent boost in 1973,

the bureau said. Output in manufacturing rose 11.7 percent in 1984, more than double the increase of 1983.

President Ronald Reagan hailed the figures as a reflection of an economy that continues to gain

"More people are working now than at any time in our history," Mr. Reagan said in response to the release of the productivity figures.

### Dollar Is Higher In Quiet Session; Pound Steadies

NEW YORK — The dollar

turned higher in quiet, late trading Tuesday, reversing earlier losses. The British pound stabilized after falling to record lows in Europe on Monday.

Daniel Holland, an assistant vice president at the Discount Corp. of New York, said the prospect of dollar sales by central banks kept the U.S. currency from rising. But no intervention was reported Tuesday.

Late dollar rates in New York, compared with late rates Monday, included: 3.173 Deutsche marks, from 3.1605; 2,663 Swiss francs, from 2.658, and 9.695 French francs, from

Frank Pusateri, a foreign-ex-change analyst, said the dollar received a lift from one large purchase of the currency. He said trading was so light that the transaction had an exaggerated impact on exchange rates.

In London, the pound recovered to \$1.1152 Tuesday as OPEC ministers in Geneva worked on a price-cutting plan to stabilize the oil market among the Organization of Oil Exporting Countries. The pound had fallen to \$1.111 after discord at Monday's session threatened to break up the 13nation oil cartel.

# China to Step Up Its Efforts To Improve Civil Aviation

BEIJING - China, which last year purchased 19 passenger aircraft from foreign manufacturers, announced Tuesday that it has decided to speed up modernization of

its civil-aviation fleet.
An official of the Civil Aviation Administration of China told the state-run news agency. Xinhua, that last year's purchases represented the nation's largest aircraft purchases.

Xinhua did not reveal the cost of the 19 aircraft, which are seven Boeing 737-200s, nine Soviet-built Tu-164s and three European Airbus A-310s.

Fifteen out-of-date planes will be retired from the fleet in 1985, the official said, adding that more jetliners and advanced telecommunication and radar equipment would go into service. The Civil Aviation Administra-

tion's major tasks at present are

updating the air fleet, ensuring safety and improving the quality of service," said the official, who declined to be identified by name. The Chinese government has decided to increase investment to modernize its civil air fleet," he said An aging administration Sovietbuilt turboprop airliner crashed in Jinan on Jan. 18, killing 38 of 41

people on board. The aviation administration, which until last year had a monopoly on commercial air service in China, has been criticized for its surly employees, poor service and inefficiency.

"In order to have civil air services keep pace with the rapid development of the national economy, the Chinese government has

JAN. 24, 1985 STOOD AT U.S. \$103,757.68 More than \$50,000,000.00 Call or write Royall Frazier at TAPMAN, Trend Analysis and Portfolio Management, Inc., Wall Street Plaza, New York, New York 10005 212-269-1041

Telex BMI 667173 UW.

We think the U.S. market is about to make a move.

At Bache Securities, we see the pieces to fuel a major U.S. market rally falling into place. U.S. inflation is down, interest rates are falling and we see solid earnings growth rather than a recession in 1985.

The time to take advantage of the U.S. market is now, but not without our 1985 Investment Outlook. It offers all our thinking, plus the 45 stocks we recommend for the coming year and many promising bond opportunities.

Make sure the U.S. market doesn't take off without you. Call or send in the coupon to the Bache Securities office nearest you.

Heileman's Offer to Buy

Pabst Stock Expires

The Associated Press

LA CROSSE, Wisconsin — A tender offer by G. Heileman Brewing Co. for Pabst Brewing Co. stock expired Tuesday with no immediate word on whether the La Crosse brewer would extend the \$11-per-

ate word on whether the La Crosse brewer would extend the \$11-per-share. \$70-million offer for stock of the Milwaukee company.

Pabst had agreed last month to be acquired by Heileman, which had in turn agreed to sell Pabst's brewery in Turnwater, Washington, and some Pabst brands to a California brewer, Paul Kalmanovitz to satisfy U.S. Justice Department antitrust concerns. Mr. Kalmanovitz's holding company, the \$8P Co., announced Monday that he was making a \$10-per-share offer for Pabst stock, an offer valued at \$64 million. l \$64 million.

### BUSINESS ROUNDUP

### Banks to Sell Swiss Watch Group

BIENNE, Switzerland - Swiss banks, which rescued the country's two principal watchmakers from bankruptcy two years ago, have unveiled plans to sell the restructured group to Swiss investors.

Asuag-SSIH, which the banks created by merging two existing companies, are the makers of Omega, Tissot, Longines and other classic watch brands.

The company announcement on Monday noted that it had renumed to profitability last year after posting an operating loss of 87 million Swiss francs (\$32.7 million) in 1983.

The company said that 7 percent of its shares will be sold to a Swiss business consultant, Nicolas Hayek, and to Stephan Schmidheiny, a Swiss industrialist. Additionally, a group of Swiss investors is being offered an option on 51 percent of share capital, the company said.

The company said that Pierre Arnold, the former head of the Swiss retail chain Migros, would become president and chief executive

steady at \$29.2 billion.

NEW YORK - Texaco Inc., the billion, or \$4.22 a share. third largest U.S. oil company, reported on Tuesday a \$552-million billion from \$41.1 billion. loss in the fourth quarter, citing a previously amounced writedown that reflected a more pessimistic assessment of the value of its oiland marketing operations widened to \$309 million in 1984 from \$30 producing assets. Chevron said its fourth-quarter profit increased to \$434 million, or \$1.26 a share, from \$403 million, or

Meanwhile, Chevron Corp., the U.S. oil industry's fourth-largest, said its fourth-quarter earnings rose 7.7 percent from the 1983 peri-

Son Co. said its profit rose 123 percent, in large part because its results in the comparable period of 1983 were reduced by plant clos-ings and the disposal of some oil and natural gas properties.

All three companies complained that earnings were dragged down by falling prices for refined petroleum products.

Tranco, based in White Plains, operations if it had not realized a New York, said the large loss in the final quarter compared with a profit of \$256 million, or \$1 a share, a year earlier. Revenue rose 16.2 per-cent, to \$12.2 billion, from \$10.5

The loss was a result of a \$765 million writedown of assets, which was announced in November

Without the writedown, earnings in the fourth quarter would have been \$213 million, or 82 cents a share, still a 16.8 percent drop from a vear earlier.

Texaco said the 1984 results of and a sits Getty Oil unit, which Texaco acquired last year for \$10.1 billion. "virtually offset" the financing costs related to the takeover.

For all of 1984, earnings fell 75.2 percent, to \$306 million, or \$1.03 a \$4.67 a share, from \$453 million, or share, from \$1.23 billion, or \$4.80 a \$3.84 a share, in 1983. Revenue share, in 1983. Without the write-idown, annual profit would have billion.

### **HOW CONTRARIANS REALIZED 800% PROFITS**

In 1982, while the DOW was dropping under 800, when the majority of seers were bearish, we rel consensus, predicting "THE DJI WILL TOUCH 1,000 BEFORE HITTING 7513". It is also riveting to recall that st, or near, the nadir of despair, a prestigious publication featured a story hear filmed: "The Death of Equities". Their orthodoxy boomeranged; the Bull rampaged to 1290, our optimism was vindicated. After the market soared, the same magazine released an article entitled: "The Re-Birth of Equities!". Once again, they were myopic; the market sagged. A month ago, Business Week published a lengthy dissourse with the scalding title: "The

Death of Mining", an obituary for the North American mining industry.

Our cerebral juices stir, we challenge their prosaic thinking. "Power Elitists" are pre-conditioned to buy Into weakness, to sell into strength, as we recognized when our researc hers recommended BOEING at \$ 16, FORD around \$17, G.M. at \$39, SEARS under \$19 (before splits), and other seasoned shares that the "Street" once scorned, misguided by herd instinct. What gurus fail to divine is that "misery" has already been factored into the price of AMAX, ASARCO, INCO, NEV/MONT, NORANDA and I PHELPS DODGE, that to sell after the "Group" has been decimated is to defy logic. When Elitists are ready to peddle their inventories, the Group will undergo a metamorphosis; fiscal events are rarely spontar leous combustion, movements are orchestrated.

Our forthcoming letter discusses why the DJI will gallop over 15/00, why mining shares will recover, in addition, CGR locuses upon a low-priced equity with the dynamics! to vault to prominence, emulating the success of a recently recommended "special situation" that escalated 800% in a brief time-span. Worldwide, Iberia flies to 21 European, 27 North & South American, and 15 African & Middle Eastern

Within Spain, Iberia flies an average of 260 times aday offering the most extensive domestic network in Europe.

And, in 1983, Iberia ranked third in on-time performance among all European airlines. Iberia's team of over 23,000 employees are working for you both in Spain and in 160 cities throughout the world. Their efforts have made Iberia not only Spain's number one multinational company, but also one of the world's leading airlines, Europe's third largest, flying over 13 million passengers yearly.

So, take advantage of iberia's worldwide network and competitive service on 4 continents. And, when in Spain, fly the most extensive domestic network offered by any airline, anywhere in Europe, at the lowest relative fares in

Western Europe. Flying Iberia is the best way to reach more places. It's no wonder we call Iberia the "Gran Vía".

Iberia: Spain's Highway to the world.

BORN AGAIN?

things hijacked and spoiled, of nature, love and rivility leached and estranged the way a familiar face grows strange in a dream. It is a novel of hairline prophecy, showing a desolate and all-too-believable future in the evidences of an all-too-recognizable present.

The wonder, though, is the sense of wellbeing that steals around us as we read it. It is the feeling of being in the best of hands. The author is Charon as a master mariner; he brings us across the Styx in a lilting maneuver that is so adept that we can't help laughing as we go, Indeed, "White Noise," besides being prophetic and sad, is very lunny.

Jack Gladney, his wife Babette, and four

children by various marriages live in the bucol-THE FISH, by Douglas Adams | 1 7
THE LIFE AND HARD TIMES OF HEIDI ABROMOWITZ, by Joan Rivers | 9 11
LOVE AND WAR, by John Jakes | 4 15
LLUSIONS OF LOVE, by Cynthia Free ic Midwestern town of Blacksmith. They are a tender, nervy bunch: they cherish and surprise each other, and DeLillo portrays them with an endearing warmth.

They live the normalcies of an academic

community, yet all these normalcies have a wild, parodic edge to them. Jack's academic specialty is Hitler; he gives courses in Advanced Nazism and tutors his Nazism majors. He is ensconced, appropriately enough, in the department of American pop culture. Babette, warm and upbeat, teaches adult education classes in posture, and in eating and drinking. Babette is Jack's fourth wife; one of his previous wives lives in a Hindu ashram in Montana; another works for the Central Intelligence Agency. A 14-year-old son, Heinrich, is

preternaturally old with up-to-the-minute scientific knowledge; he is growing bald and insists that any emotions he may feel are simply neural activity.
Information — the "White Noise" of the title — invades and displaces. Jack feels a sense of validation by higher authority when the electronic machine at his bank confirms that his balance is roughly what he supposes it to be. Shopping at the supermarket is a rite, and its profusion of food is a guarantee that society

the items as "failed possessions." Odd things occur. The school is evacuated one day because of a real or suspected toxic emanation; one of the teachers was reported to be rolling on the floor and speaking in foreign languages. Wilder, the Gladneys' toddler, cries for seven straight hours one day, and then stops suddenly. These are signs, omens.

is still holding together. Objects are transient When Jack passes a garage sale, he thinks of

Then a black cloud appears over the railroad yards, and the town finds itself heading toward evacuation sites. Gladney is initially skeptical. These things don't happen to professors, he says, "but to people in mobile homes in the

scrubby parts of the country where the fish The cloud passes, but life grows stranger. A

**BOOKS** regular disaster drills. Jack's daughter arranges her calendar around the days when she has to play a corpse. The fear of dying that both Jack and Babette have bottled un incident

By Don DeLillo. 326 pp. \$16.95. emerges and twists their lives into melodramat-

ic patterns.

Toward the end, DeLillo lets the wildness go briefly out of control, but that is a minor defect in a stunning book. The author has engaged us thoroughly with his Gladneys; we adopt them as our Noahs; we register the damage when the contamination and alienation of a society past the civilized customs of a college town; and human control mark them, and we cheer their

erally from a cloud of noxious gas escaping from a ruptured railroad tanker. But the poi-sonous leak is related to something more gen-eral: the expedients of an encroaching technolstruggles to resist.

The toxic cloud, terrifyingly described, is the central symbol of humanity's inability to master its knowledge. But, through tenderness, wit and a powerful irony, Del. illo has made every aspect of "White Noise" a moving picture of a disquiet we seem to share more and more.

Richard Eder is on the staff of the Los Angeles

### BRIDGE

By Alan Truscott

O Nthe diagramed deal after a surong artificial opening of two diamonds and an artificial response of two spades, North showed a strong balanced hand. The bidding continued as it would have done after a two no-trump opening, with a Stayman response followed by a cue-bid. There was one trick, however: South became the declarer in six spades. South won the club lead in dummy, cashed two top

trumps and the remaining club

Closing Prices in local currencles

The ace and king of hearts were taken, and South took note of the appearance of the jack on his left. According to the principle of restricted choice, the jack was much more likely to be part of a doubleton than a false card from J-10, so South finessed the nine on the way back.

If West had ruffed, he would have been end-played. He therefore discarded, and discarded again on the heart queen. But this only postponed the evil day. South led a trump, and West was forced to lead from the discarded being as seen winners. Diamonds were from the diamond king or con-thrown from the closed hand. cede a ruff and sluff. cede a ruff and sluff.

# Soccer's First Knight Returns to the City of His Legend

LONDON - Give an Englishman time and he fondly turns to nostalgia.

His letters now carry postage stamps de-picting the lost age of steam railways—great old individuals like the Flying Scotsman, the Golden Arrow and the Cheltenham Flyer and his sporting literature harks back to Stan Manhews, the wizard of the dribble.

Sir Stanley, the first soccer knight, turns 70 on Friday, and on Monday, after they have done feting him in Toronto, where he settled, he will make a rare return to Stoke-on-Trent, the English potteries city where he and his legend took shape.
There will be a banquet in the Sheraton

Center in Toronto, a grand ball in Stoke, and, age never having withered Matthews's addiction, at least one gentle game of soccer for him to express himself.

Memories of the old maestro, revived in baggy pants and sepia tones, became endemic last weekend. The most cynical of soccer scribes dipped their pens into human kindness; the young observers among them suddenly became witnesses of the prime of Stanley Matthews.

More than one would suspect have memories that stretch back to swept-back hairstyles, parted down the center and held down by Brylcream. In their streets, every kid shuffled up to an opponent, lowered the left shoulder, flicked the ball right, and shot by the unbalanced defender. Second-generation

Since I, alas, confess to missing out — to coming into play when tactical bores were beginning to re-invent the game so that No. 7 was nothing but another functionary - I gratefully latch onto this descriptive prose from one J.P.W. Mallalieu:

"Have you ever watched a dragonfly, how it hovers in one spot with its wings vibrating

and then apparently, without changing gear, darts away at top speed?" he wrote.
"Many times I have seen Matthews, the

ball as ever at his feet, hemmed in by a watchful opponent. There has been no room to move, so Matthews has hovered, his whole body vibrating, while his opponent watched

### ROB HUGHES

"Suddenly Matthews has made his dart to the right and his opponent has darted with him. It is only seconds later that we and his opponent see that Matthews has in fact dart-

A marvelous vignette, though possibly col-ored by the gentleman's political leanings. For most other followers insist that Matthews, "the one-trick magician," invariably feigned to go left but ended up sprinting down the right touchline outside his oppo-

By the time my generation caught up, Mat-thews was nearing 50, still playing First Divi-sion, still performing the same tease, able by then to put a man on the seat of his pants

shoot by reputation alone.

Speed off the mark was a winger's asset, but more than anything, Matthews used instinct to know precisely when a defender's balance was toppling, and then a devastating bodyswerve to spring clear. I doubt any matador did it better in the bullring.

Bow-legged and bony, he would set up goals with crosses that, so legend has it, not

only delivered the heavy old leather ball with unerring accuracy but also with the lace facing the other way, so as not to hurt the centerforward's head.

He was a pro through 35 seasons, well over 1,000 games, and, at 41, nearing the last of his 54 internationals, I just barely recollect him bemusing the great Nilton Santos while En-

His astonishing longevity was a product of three things: obsessional love of soccer, fanaticism for fitness and the era that placed more emphasis on artistry than long-distance

Matthews was born two miles from Stoke, son of Jack, "the Fighting Barber of Hanley," whose nifty footwork serviced 350 featherweight boxing bouts. Taboos of alcohol and sobacco were instilled from the cradle; deep breathing and wrestling with chest expander were an order of the early morning, and father's severe regimen bred Stan's introver-

The player inside him, however, was liberated at 11. Until then school center-half, he broke rank to score eight goals in one game (who says Franz Beckenbauer invented attacking libero?).

Very much a winger - though modern coaches, refusing to acknowledge anything good came from the past, call them "wide men" — Matthews became Stoke City property. Office boy at 15, first teamer at 17, England International at 19.

After war years spent on the RAF's wing, he transferred to Blackpool where he could run his hotel and inhale sea air. And in 1953 the nation inhaled the Matthews final, the pure theatre of a supposedly aging star of 38 fulfilling his ambition to win the FA Cup.

Gray newsreel revives the last 20 minutes in which Blackpool, 3-1 down, astonishingly won, 4-3. It forgets how injury reduced Bolton to effectively nine men, how others scored the goals. Stan was, by destiny, the

Not noted for industry - indeed indignant if passes came a foot too short - Matthews is thus remembered as Wembley's Pimpernel, dancing here, darting there, desperate to in-spire one of history's comebacks. As a perfor-

mance it hardly equaled his three goals, all left foot, struck from inside-forward where he had replaced an injured England colleague against Czechoslovakia in 1938; in lasting value it was second to Matthews's return to Stoke in 1961, lifting his club to promotion from Division Two and the crowds from 10,000 to 33,000.

There followed, after 50, a brief, tainted attempt at management with nearby Port Vale, a club caught making underhand payments. Stan then went abroad, walking out on a long marriage, and nomadically treading the turfs of Malta, Australia, South Africa, the United States and, finally, Canada.

He was welcomed in every port as a coach; known everywhere for sorcery that transcended the difficulty of a pre-television age. One hopes his homecoming next week will do Sir Stanley no ill.

The Victoria ground stadium he will find more palanal and more empty than ever he knew it. The team, youngsters without suffi-cient guile, is marooned hopelessly at the foot of Division One. The manager recuperating from nervous exhaustion. The crowd long gone, and the bank overdrawn up to half a million pounds.

True, his No. 7 shirt is worn by the best

Stoke has — Mark Chamberlain, dubbed "the Black Matthews," who hopes soon to be sold to a worthy club. It is cruel, but possibly true, that Matthews could take the field in his overcoat and at his age waltz around the defense wearing his first club's colors.

It may also be that he would fail, today, to measure up to the media bassle, the requirement to sweet-talk into a microphone before, immediately after and (down South America way) during play.

And that failure would be our loss, proof

that we no longer know how to let a man's ability do his talking.

Stan Matthews, at age 48, still dancing and darting.

A change for Olympic medalist Scott Hamilton: There will be no new title this year.

# 4 New Kind of Judging for Hamilton

NEW YORK — The judges have it stopped examining Scott Hamin. They have just moved to a fferent location.

Their approval or disapproval is om 6.0 down that once defined 's ligure-skating career, but the me silent questions are being ked Is he ready? Is he rested? Is e costume right? Is the music orking? The difference in Hamila's new professional life is that ost of the judges can be found side his head.

"I'm not going to wave at the owd for a living," he said. "I'm only going to do that. I'm working

At the time of year Hamilton gw to live for, with the amateur nional championships to be held is week, he is an entertainer after years as a competitor. It is nearlive years since he carried the merican flag in the opening cereonies at the Lake Placid Olymes, and nearly one year since he on the gold medal at Sarajevo and ok that extra victory lap around e Zetra arena, waving an Ameri-

17 years as a competitor

By Malcolm Moran can flag and leading the three med- to the Olympics in time for him to lists round the ice.

After all those years in which his existence was carefully arranged to meet the demands of those peak moments, Hamilton's schedule has been revised. He is appearing in Ice Capades performances. He will skate in two shows at Madison Square Garden on Wednesday, two on Thursday, one on Friday night, three on Saturday, two on Sunday.

There are two clearly defined parts to his skating these days. In the first half of the show, Hamilton performs a compenitive routine. In the second half, with the house lights on and with a microphone in his hand, he encourages children to go wild. He teaches the fine points of The Wave, and if the kids don't get it right the first time, Hamilton has been known to remind an audience that the crowd at a nearby arena did this much better.

. He shares the audience with blue Smurfs when he performs in the West, multicolored Sporks in the East. Years of effort were required for Hamilton to convince the establishment of the sport that a 5-foot-3 (160-centimeter) skater could reach the same athletic achievements of someone much taller. Yet when that convincing was finally completed, he moved on and took advantage of the economic opportunity that comes with a gold medal, only to share a stage with Smurfs.

He was always conscious of the balance within the sport of athletic skill and artistry. Now, at different times, he appreciates the added artistic license and misses the competitive urges that a show can seldom satisfy.

"The greatest feeling in skating is the 10 minutes after you win," he said. "Because you see that every-thing you've done — all the work and all the time that you've put is the work and all the time that you've put was it, injury and everything else - was worth it. The feeling of accomplishment. The ego inflation you get from just winning a competition.
That 10 minutes is the greatest NHL Standings thing in the world. That's what you work all year for, that 10 minutes. Then you have it forever, the fact that you did it, and you won it, and you proved yourself. I'm going to h.v. Islander miss those 10 minutes for a long N.Y. Romsers

a disease. You like being in front of them, and you like showing off and you like the applause. It's a feeling of acceptance.

Basketball Association victory over the Philadalphia 76ers.
"I was kind of upset," said

Aguirre, who made last year's All-Star team. "I came out to win." And he helped nail down the triumph with eight points in the final three minutes after the Mavs saw a 13-point lead disappear to a 98-98 deadlock with 4:36 to play as Julius Erving and Moses Malone

DALLAS — Mark Aguirre, snubbed by the All-Star selectors,

drilled 17 of 25 shots from the floor

and scored a career-high 49 points

Monday night, leading the Dallas NBA FOCUS

Mavericks to a 111-109 National

al. He is 26 years old, and there is still time. He remembered Irina Rodnina of the Soviet Union, who foot jump shot with one second to was part of three gold-medal win-ning pairs, with Alexei Vlanov in 1972, and with Alexander Zaitsev

# **SPORTS BRIEFS**

### In addition to King, the East Oilers Defeat Flames in Final Seconds

EDMONTON, Alberta (UPI) - Mike Krushelnyski scored with two seconds remaining in the game to lift the Edmonton Oilers to a 4-3 victory of Washington, forward Terry over the Calgary Flames in the only National Hockey League game Cummings of Milwaukee and Monday night.

Krushelnyski fired the puck from the slot past the Flames' goalie, Krushelnyski fired the puck from a Wayne Gretzky shot.

Sidney Moncrief of Milwaukee and Rejean Lemelin, after picking up a rebound from a Wayne Gretzky shot. Micheal Ray Richardson of New Mark Napier, who along with Gretzky drew an assist on the play, tied up Lemelin in front of the crease.

# Zürbriggen, After Surgery, Sets Pace

BORMIO, Italy (UPI) - Pirmin Zürbriggen of Switzerland, in his first Denver and Larry Nance of Phonix and guards Rolando Blackman
of Dallas and Norm Nixon of the
Los Angeles Clippers.

Arck English, Cavin Nait of
Denver and Larry Nance of Phonix and guards Rolando Blackman
of Dallas and Norm Nixon of the
Los Angeles Clippers.

Serious outing after knee surgery two weeks ago, Tuesday set the fastest
time in men's downhill training for the World Ski Championships.

Zürbriggen covered the 3,430-meter course, with a vertical drop of
1,010 meters, in 2 minutes, 10,04 seconds, almost 1.5 seconds quicker

than any of the other top racers.

Opening ceremonies for the Championships are Wednesday, with the first race — the women's combined downhill — slated for Thursday.

### For the Record

Basketball

Muhammad Ali, the former heavyweight chammion, was among those named Monday as recipients of annual awards given by the Boxing Writers Association of America. Ali will receive the James J. Walker Award for "long and meritorious service to boxing." Milton McCrory, the World Boxing

will fight fellow American Pedro Vilella in a title bout March 9 in Paris. Alan Jones, who won the Forunda One championship in 1980, is returning to the Grand Prix racing circuit, it was announced Tuesday. Jones, 38, will emerge from a three-year retirement to drive for the new Beatrice team, which expects to make its debut near the end of the 1985

Defending champion Jack Nicklans and the 1984 runner-up, Andy Bean, head a list of \$7 golfers who have qualified and been issued invitations for the 1985 Memorial Tournament. (AP)

# Medicine's Bitter Bill

By Russell Baker

NEW YORK — I recently underwent the experience of paying a hospital bill out of pocket. As a result of the experience, I have discovered an important cause of geance of anesthesiologists. inflation, which economists seem to have overlooked.

Like so many great discoveries, this one will seem obvious when I

You didn't see it before, friend, plained. because you have not had to pay a hospital bill with your own hardearned money. And why should paid by governments, or by insurance companies, or by combina-tions of the two. And here lies the key to my discovery.

The hospital people who compile your bill naturally assume that it will be paid in the bulk by some immense bureaucracy wallowing in

These hospital people - decent, humane people devoted equally to physical and moral antisepsis never imagine that the bill they toil night and day to lengthen might have to be paid by a human being, a person made of the same fragile clay as they and, as such, just as capable as they of being financially destroyed when confronted by double-digit aspirin tablets.

The bureaucracies, upon receiving such a bill, will commit it to amazing machines accustomed to dealing in billions though operated by modestly paid humans whose spirit has been broken by the machines. Will such people, humbled by their sense of inferiority to the machines, intervene to say, "Here, bere, machine! You don't intend to pay that absurdly inflated hospital bill, I trust?"

They will not. The Pentagon has demonstrated with blood-chilling effect that such whistle-blowers always end up sleeping with the fish-

So the hospital bill compilers labor to produce bills like this one. which asks me to pay a couple of big bills for an anesthesiologist.
"But there was no anesthesia administered." I tell the bill compiler

on the telephone. True, but we had an anesthesiologist standing by in case he was This, I supposed, meant a resident was drinking coffee and reading newspapers in the hospital cafe-teria. Still, I didn't argue this. Only fools and masochists court the ven-

On the other hand, this arithmetic error that has turned a \$96 item into a \$960 charge is insupportable. "Your machine just arbitrarily multiplied the cost by 10," I com-

"All right, all right," grumbled the biller.

"Don't 'all-right' me, buddy. I've you? Nowadays hospital bills are got to refinance the mortgage and sell two children into slavery to pay this bill," I said.

I could hear him turning white with shock at the other end of the telephone. "You are paying the bill

with your own money?"
From his gasps, I gathered it was a first for him.

I am still negotiating on a few disputed thousands, but the hospital has been merciful since determining that I wasn't joking about the money coming from a human.

From this experience, I conclude that the reason bills are grotesquely inflated in certain areas of Ameri-can life is the billing agent's as-sumption that he can do his worst without causing any human pain. This explains the comic absurdities of the bills that military contractors

send to the Pentagon. It is not as though Cap Weinberger will have to sell his car to pay them; something monstrously freighted with money and called "the government" will pay them.

In the same way, fancy lawyers charge \$250 an hour for their services. That's \$500,000 a year for a lawyer on the 40-hour week, but no human beings are paying that kind of money; it is paid by corpora-tions — things — which in turn account it to the expense of doing business, thus reducing their tax bills so that — aha! — something monstrously freighted with money and called "the government" is

really doing the paying. Juries understand this, of course; they dispense millions to people suing for libel and medical malpractice. The theory is: It's no skin off anybody human. And so we get Pentagon hammers at the price of gold and the double-digit aspirin

New York Times Service

# The Durability of Ann-Margret

By Stephanie Mansfield

B'ashington Post Serrice WASHINGTON — There is one scene in Ann-Margret's

film repertoire that says it all. It's a bedroom scene, in the 1965 "Cincinnati Kid." But it's not her sultry purt or sex-kitten strut that is so quintessentially Ann-Margret.

She kneels on a bed, clad in a scanty negligee, a jigsaw puzzle spread before her. She takes a fiece and places it on the puzzle. It doesn't fit. She tries forcing it. It still doesn't fit. Karl Malden. playing her gambler husband, scowls at her, telling her to give up. She cocks an eyebrow, picks up a nail file, shaves away one side of the piece and bangs it into

place with her fist. Determination. That and a sly vulnerability are what make Ann-Margret, 43-year-old motorcycleriding grandmother and veteran of 38 movies, one of the most durable stars Hollywood ever dished up.

Never mind all the bimbo parts ("Kitten With a Whip," "Bye-Bye Birdie," "The Pleasure Seek-ers," "Bus Riley's Back in Town"), the steamy gyrations ("Viva Las Vegas") or the exchanges with leading men from Steve McQueen to Elvis Presley. Joe Namath to Jack Nicholson,

"I knew I had something to offer in the way of dramatic ability a long time ago," she said, sipping tea in her Washington hotel room. She was in town to promote the British film "Return of the Soldier."

It is a breakthrough of sorts for the Swedish-born actress. She is cast as a dowdy, aging spinster — a part, she said, for which American directors would never have considered her.

"It was a challenge not to stand out like a sore thumb, but I never felt intimidated." she said, referring to her co-stars - Glenda Jackson, Julie Christie and Alan Bates. "Did I 'surprise' people? I just think it's so funny." laughed with gusto. "That word has been used so many times. I love surprising people."

Recalling her early career, she said in her familiar, little-girl whisper: "I was extremely serious about my work. Always. The roles were fluff."

Ann-Margret: "Much more of a peaceful feeling."

part of overweight, victimized Bobbie Templeton in "Carnal Knowledge." She was nominated for an Academy Award and won daring role in "Tommy," another Oscar nomination and the Gold-en Globe for best actress. Recent-Blanche DuBois (whom she nick-

Tennesee Williams's "A Streetcar Named Desire."

named Blanche DuBonkers) in

Now the roles are more sub-stantial. It began in 1971, when face-smashing, nearly fatal fall Mike Nichols chose her for the from a Lake Tahoe hotel stage platform in 1972. Her father was dying of cancer at the time; 10 weeks later — "I had to prove to him that I could do it" - she was Golden Globe. Then came a back on stage. She won a settle-aring role in "Tommy," another ment for \$1.5 million from the hotel. "I still get a sick feeling in

my stomach when I look down," ly she starred in two made-for-television films — as a cancer victim and mother of 10 in "Who Will Love My Children," and as show, film after film, television special after television special. There was a nervous breakdown in 1980. A year later her husband amed Desire."
and mentor of 18 years, Roger very determined, "I just want to The same firmness of purpose ("77 Sunset Strip") Smith, was do things I want to do."

diagnosed as having myasthenia gravis, an incurable neuromuscular disease.

Smith walked into the room. looking tan and fit. "Unbeliesable," whispered Ann-Margret. knocking the wooden end table with her knuckles. He's in remission.

Whatever talent she may lack - no one would confuse her with Meryl Streep — she has more than made up for in hard work. She is known as tireless performer, a total professional, "I've been known to be obsessive." But there is one thing even Ann-Margret's determination

cannot overcome — her inability to have children. We've been trying for 13 years," she said. Her husband has three children from his first marriage, and Ann-Margret is a step-grandmother.

She has been off the stage for nearly two years. Can she live

without the applause?
"That's interesting," she said, staring into space, "It's interesting because I don't miss it - for the first time in my life. I guess. I get it now from doing a role, from acting, I'm gratified when I come home from a day's work and I've done the best I can in portraying a character. I get that same feeling of grautude."

She placed her hand over her heart, "It's much more of a peaceful feeling going on in here. I'm very lucky." she said, knocking the table again. "that I'm not crazier than I am."

Her next project will be starring in a made-for-television movie about a Midwestern teacher who is raped, becomes pregnant and decides to keep the baby. Again, not a typical role for a woman once considered something of a Hollywood joke.
"I really feel for people who

come out of a different area of the entertainment world and go into drama. It's much easier for someone to come out of the ranks of the New York theater, off-Broadway or whatever.

The way Ann-Margret did it. "it takes more time for people to think that they're serious about

Now, she said, looking very,

# Royko: 66% Opt for Sex

drew responses from about 10,000 rock stars. Richie said he and Jack-son wrote the American counterpart. "We Are the World." demn me as a male chauvinist pig." Royko said 22 percent of the men indicated they would opt for bowling, drinking, golfing, cuddling or almost anything else. He said the other 12 percent included men who survey, in which the majority of the more than 90,000 women responding to a question in the advice column said that, if they had to choose, they would be content to be held close and treated tenderly, and would skip sexual intercourse. . . .

Almost 70 percent of people responding to a Denver Post survey rejected the Landers poil, "I can't believe Ann Landers's results," one woman wrote. "She set women back 1,000 years."

Lionel Richie has won six American Music Awards, including four for videos, easily outdistancing Prince and Kenny Rogers in voting for the United States's favorite singer. Richie fell one short of the record seven awards received last year by Michael Jackson, who was nominated four times this year but did not win. Richie defeated Prince in voting for favorite pop-rock and black music male vocalist, and poprock and black video artist. His "Hello" bested Prince's "When Doves Cry" for favorite pop-rock and black video single. Prince beat Richie for favorite pop-rock and black album with the hot-selling "Purple Rain" and black single for "When Doves Cry." Rogers won three awards, for country male vocalist, for "Eyes That See in the Dark" as country album, and with Dolly Parton for "Islands in the

Stream" as country single. Bruce Springsteen beat Prince in voting

for another major award; his

Dancing in the Dark" was the

or bowling" survey are in: 66 per-nies to record a single to raise monsaid they preferred sex over "bowling, drinking, golfing, cuddling or Springsteen lackson Decreases." said they preterred sex over "bowling, drinking, golfing, cuddling or just about anything else." In a column titled "Cuddle Up With This Survey, Ann," the syndicated Chicago Tribune columnist reported Tuesday on his pull, which he said draw recorded late last year by British and the syndicated Chicago Tribune columnist reported Tuesday on his pull, which he said draw recorded late last year by British and the syndicated Chicago Tribune columnist reported Tuesday on his pull, which he said

0 Martin Scorsese, whose films have often explored alienation in the modern world, may be taking other 12 percent included men who couldn't decide "or took this as an opportunity to write a creepy note Bull" and other films, is expected to my secretary." Royko's poll was inspired by Anna Landers's recent verdi's "Rigoletto," to be staged at Vertil's "Rigoletto," to be staged at a cultural festival near the Adriatic port city of Ancona from July 20 through Aug. 18, the Rome daily II Messaggero reports.

Indira Gandhi was posthumously presented the 1984 Jawaharlal Nehru Award for international understanding. Her son, Rairy Gandie, who succeeded her as prime minister of India after she was assassinated, accepted the prize, and said the \$20,000 cash award would be put in the Indira Gandhi Memo

Cathy Evelyn Smith has been arraigned in Los Angeles on murder and drug charges in the drug-over-dose death of the comedian John Belushi, Smith, a former singer, did not enter a plea.

Mary Decker, who has been unable to live down her display of temper at the Summer Olympics. has been named the first female recipient of TV Guide magazine's "Mr. Nice Guy" award for boorish behavior. Decker entered the Los Angeles Olympics as the favorite to win the 3,000-meter race, but got tangled up with her top rival, Zola Badd, and fell, injuring her leg.

The Greek shipping heiress Christina Onassis-Roussel had a baby girl Tuesday at the American Hospital in Neuilly, a suburb of Paris. She married a French busifavorite pop-rock single. . . Do-zeus of singing stars went from the fourth husband, last March 17.
